

Amazon Firestick - App versions

Version 3.2.0

FirestickDate: 13-02-2019

What's New

Split Tunneling

We have brought our Split Tunneling feature to the Firestick app so that you can specify which apps use the VPN and which don't.

Local IP Fixes

We have performed a few tweaks to ensure your privacy and security never gets compromised.

Fixes

We identified and fixed a few minor bugs, which will go a long way in ensuring your VPN experience remains seamless.

Version 3.0.1

FirestickDate: 27-12-2018

Fixes

Fixed wired connection issue.

Version 3.0.0

FirestickDate: 24-12-2018

What's New

Improvements

7-day trial added.
Added Popular apps to the streaming list.
Added optimized servers for better connectivity.
Improved & simplified UI/UX.

Fixes

Minor Bug Fixes.

Version 2.0.2

FirestickDate: 07-08-2018

Fixes

Fixed issues where sometimes users were unable to disconnect VPN.

Version 2.0.0

FirestickDate: 27-07-2018

What's New

Split Tunneling

We have introduced the split tunneling feature so that you can specify which the app for which you need to use the app.

Feedback

To ensure that your voice and opinion is heard, we have integrated the feedback option so that you can submit the assessment of the app online, and have your queries resolved right away.

Auto Connect

We have also integrated the auto connect option so that the app reconnects automatically, in case the connection drops or the device is restarted.

Version 1.1.9

FirestickDate: 24-05-2018

What's New

Improvements

Just made a few changes here and there to accommodate General Data Protection Regulations (GDPR).

Reiterated our commitment to preserving no logs in our database, thereby keeping everything transparent and Pure!

Brought in more stability and discipline for Firestick traffic so that it doesn't crash anymore – the

way it did in previous versions.

Version 1.1.8

FirestickDate: 08-05-2018

What's New

Improvements

In this version, we enhanced the connectivity and security related issues which we diagnosed in the previous version, and spat them right away.

We also optimized the booting time so that you can log on to your system as quickly as possible. And in rare instances when you are unable to connect, or the connection drops, an automated system would help you to reconnect again right away.

An improved user interface would help you to navigate the system in a better way, helping you to focus on things that matter to you most.

And even when the connection is limited, our improved system would help resist disconnectivity.

Version 1.1.7

FirestickDate: 26-04-2018

Fixes

Fixed a bug that could impede your connectivity and lead to longer connection request.

Version 1.1.6

FirestickDate: 10-04-2018

Fixes

Got rid of a minor bug that could lead to slower connectivity and impede streaming on your device.

Version 1.1.5

FirestickDate: 06-04-2018

What's New

Features Added/ Changelog

Primed the user interface making it more seamless and easier to browse your favourite content.

Fixes

Purged off the app off minor, pesky bugs.

Version 1.1.4

FirestickDate: 28-03-2018

Fixes

Eliminated the minor bugs that to auto-disconnect after logging in.

Version 1.1.3

FirestickDate: 22-03-2018

Fixes

Got rid of those pesky pop ups that hampered your user experience on your Firestick.
Fixed a few bugs that could make your user experience plague and bothersome.

Version 1.1.2

FirestickDate: 09-03-2018

Fixes

We identified a few minor bugs, and made sure they were wiped off the app.

Version 1.1.1

FirestickDate: 01-03-2018

What's New

Features Added/ Changelog

Made sure that experience is absolutely seamless by integrating Smart Connect button into the app.

Fixes

Revamped the UI giving it a cleaner, crisper outlook.
Pure-ified the app from bugs which we identified in the previous version.

Version 1.1.0

FirestickDate: 01-03-2018

What's New

Improvements

Added in more Pure-ity to the app by optimizing the connection speed across all major servers.

Version 1.0.8

FirestickDate: 29-12-2017

What's New

Improvements

We cleansed up the app from a rare, yet ill-befitting crash that would happen in the middle of onboarding for some devices.

Disinfected the app from a few bugs that could impede the performance.

Version 1.0.7

FirestickDate: 19-12-2017

Fixes

We identified a few shortcomings that lead to crashes on Sony Bravia and Amazon TV devices. Moreover, we fixed the app from VPN cancellation issues. Finally, we also fixed the login dialogue error that occurred in previous versions.

Version 1.0.6

FirestickDate: 15-12-2017

Fixes

We scoured the app off all the bugs that would hamper your experience

Version 1.0.5

FirestickDate: 14-12-2017

Fixes

Fixed issues where some particularly pesky bugs led to app crashes and freezing issues.

Version 1.0.4

FirestickDate: 19-11-2017

Fixes

As for the minor issues that could possibly impede the performance on your Firestick device, we got rid of them as well!

Version 1.0.3

FirestickDate: 14-11-2017

Fixes

We fixed issues that were reported from the previous interface to offer you a better, and more seamless experience while using PureVPN.

Version 1.0.2

FirestickDate: 04-10-2017

Fixes

Pure-ified the app from bugs and issues that made the process tough.

Version 1.0.1

FirestickDate: 25-09-2017

What's New

Features Added/ Changelog

Introduced Quick Connect – an easier and faster way to connect with a world to seamless, and anonymous internet connectivity.

Added in Protocol Support to ensure faster, more reliable and a more secure network via TCP/UDP.

Complimented the app with a guided onboarding process for new PureVPN users.

Conjoined the app with authentication support for easier Login and Sign Up

Placed in User Profile in the app, so that you can manage your profiling right from your device.
