

## How to Setup PureVPN on Android Using SSTP VPN Client

The following is a tutorial which will help you configure PureVPN SSTP on Android device using a third-party app called **'SSTP VPN Client'**.

### Things to Consider:

Before you begin, please make sure that:

- You have an active internet connection
- You have the SSTP VPN Client [app](#)
- You have a Premium PureVPN account (If you haven't bought it yet, buy now from [here](#))

1 Open your 'SSTP VPN Client' app.

2 Tap the '+' icon at the bottom right corner of your screen.

3 Click the 'Empty VPN Profile' option.

4 Type 'PureVPN' in the 'VPN Name' window. Then tap 'Remote servers'.

5 Enter the PureVPN server address with which you wish to connect and then tap 'OK'. You can view the PureVPN server list [here](#).

6 Tap the 'Save' icon at the top of your screen.

7 Turn VPN connection On by tapping the toggle.

8 Tap the 'Play' icon to connect with PureVPN SSTP.

9 You will then be asked to grant permission. Check-mark the 'I trust this application' option and tap 'OK'.

10 Now, enter your PureVPN Username and Password and tap 'OK'.

11 You'll then see the app establishing a VPN connection.

12 Congratulations, you are connected to PureVPN SSTP!!!
