

## How to Setup PureVPN on Tenda AC-18 Router

### Things to Consider:

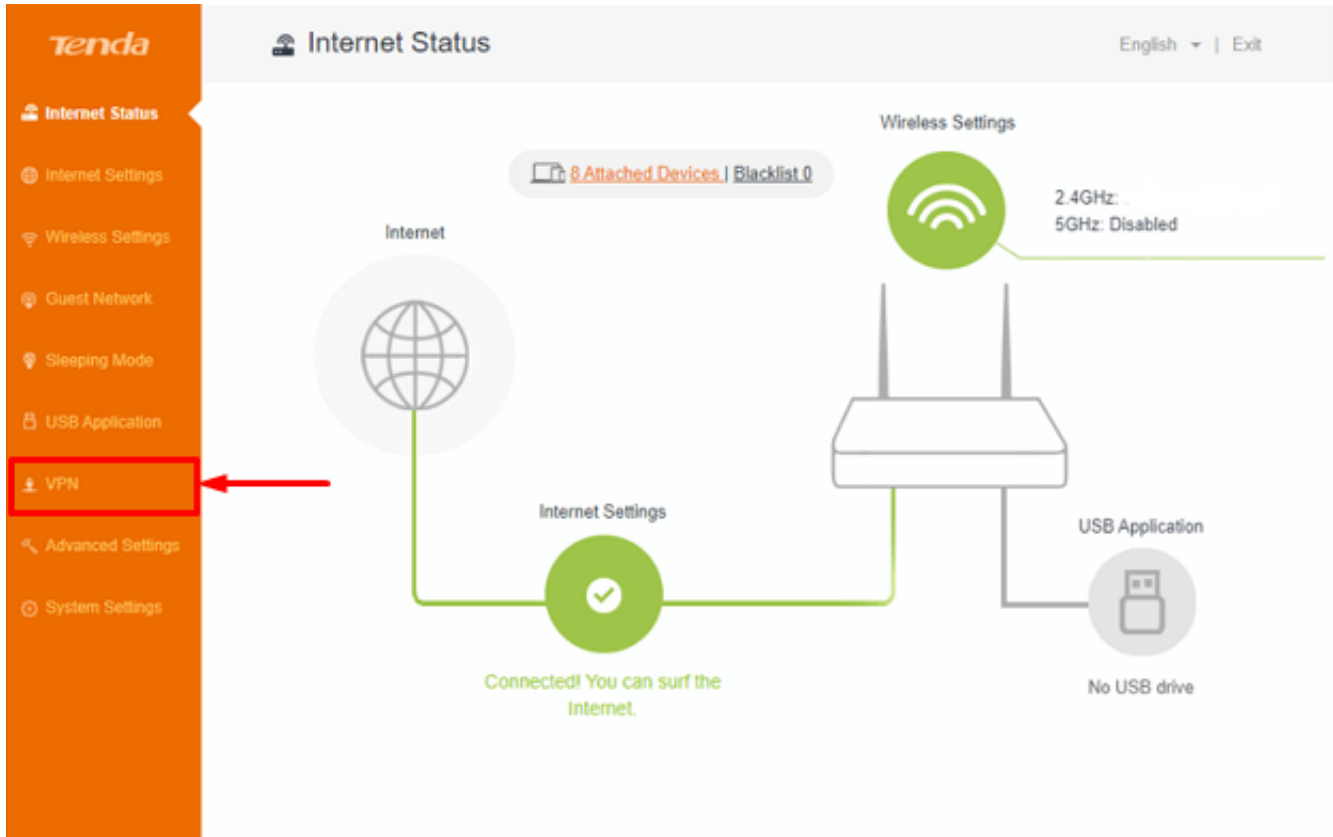

Before you begin, please make sure that:

- You have a working internet connection
- VPN Supported Router.
- Own a premium PureVPN account (If you do not already own one, you can buy a subscription from [here](#))

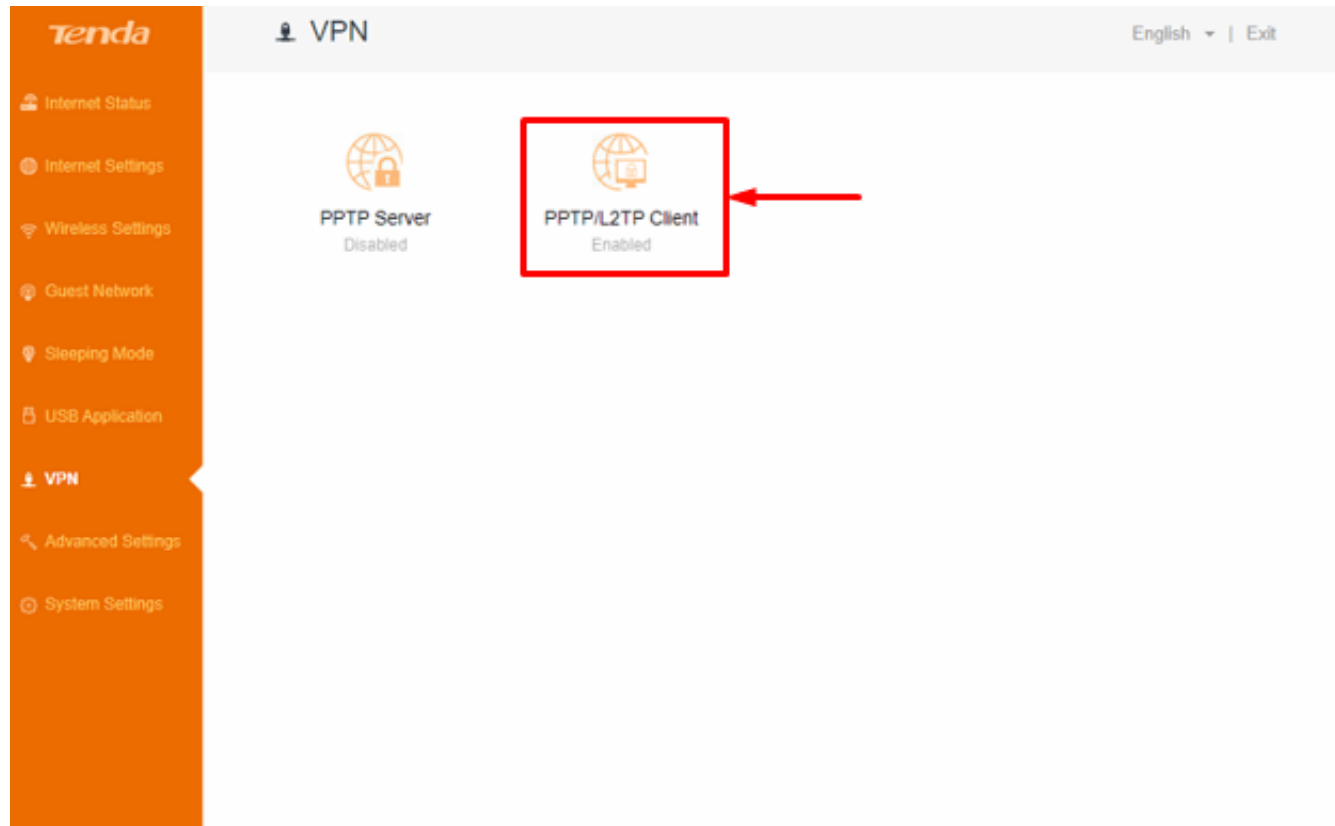

1 To start set up VPN on Tenda router you first have to connect to it. For that you have to put in your browser the following address: **http://192.168.0.1** (If this doesn't work, please consult your router's manual to find what is the Default Gateway Address). Enter your router's password and click '**Log In**'

2 Once logged in, select the 'VPN' option from the left-side menu.

3 Then select the “PPTP/L2TP Client” option under the VPN tab.

4 Now enter the following information:

- Client Type: PPTP
- MPPE Encryption: Off
- Server IP/Domain Name: (Enter the IP address of the VPN server you want to connect to in this field. [Click here](#) on how to convert server address into IP address)
- Username: (Enter the PureVPN username i.e. purevpn0sxxx)
- Password: (Enter the PureVPN password)
- Once you have entered all the information, click on the “Connect” button to activate the VPN connection.

**PPTP/L2TP Client** ✕

PPTP/L2TP Client:

Client Type:  PPTP  L2TP

MPPE Encryption:

Server IP/Domain Name:

User name:

Password:

Status: Connecting .

**Connect** ←

5 PureVPN is successfully connected now on your Tenda AC-18 router. If the IP doesn't change, check to restart your router once or contact our 24/7 Live Chat support for help.

### PPTP/L2TP Client ✕

PPTP/L2TP Client:

Client Type:  PPTP  L2TP

MPPE Encryption:

Server IP/Domain Name:

User name:

Password:

Status: Connected

Obtained PPTP Address: 172.111.157.99

That's about it. Enjoy total and unlimited internet freedom with PureVPN!
