

## How to setup PureVPN manually on Buffalo Router

For maximum security, you can always configure PureVPN on your Buffalo router. However, if you are not sure how to make this possible, here is what you need to do:

### Things to Consider:

Before you begin, please make sure that:

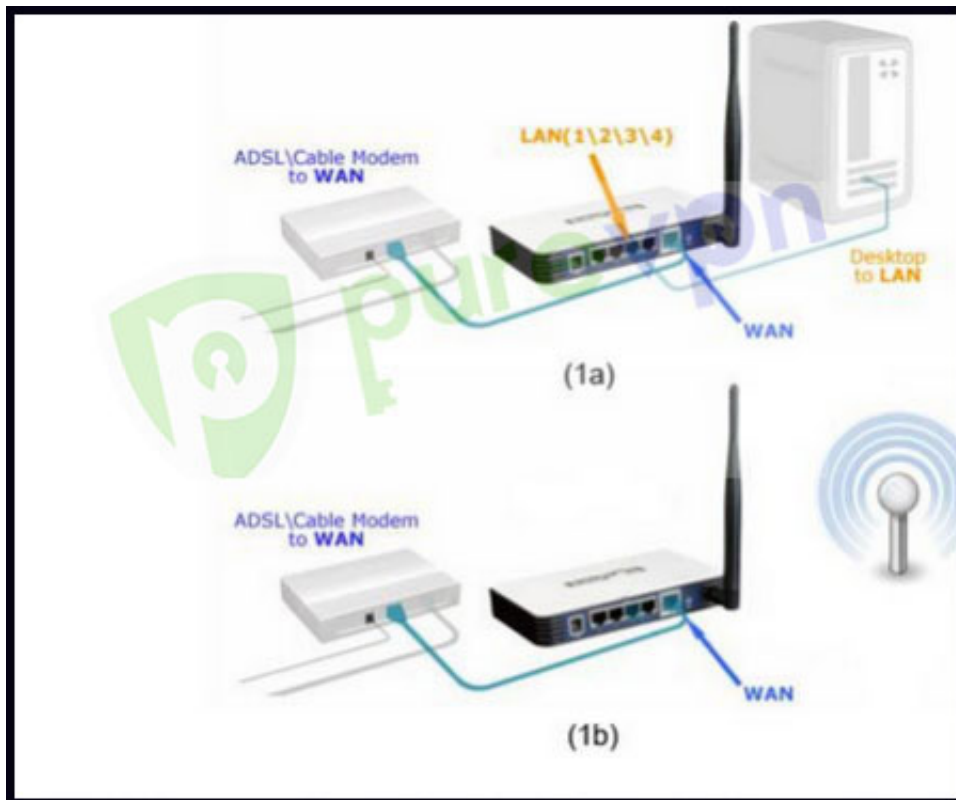

- You have a working internet connection
  - VPN Supported Router.
  - Own a premium PureVPN account (If you do not already own one, you can buy a subscription from [here](#))
- 
- Please go through the given description in the following image.

- This image shows that how your VPN setup will look like:

1a. Shows an Ethernet connection from router to computer.

1b. Shows wireless connection from router to computer.

Note: In order to setup PureVPN on Buffalo Router, you must have DDWRT firmware installed on your Buffalo Router. Please [click here](#) for further instructions.
