

PureVPN's Shortcut - Your Shortcut to Access Atreaming

Streaming through VPN was never been so easy.

Want to watch your favorite sports team or show but can't because it's not available in your country? Well, we are excited to tell you that in the latest update of our applications we have added a Shortcut option that allows users to access their favorite streaming applications. Sounds good?

Whether it's Hulu in the US or Netflix in the UK, you can still enjoy your favorite content with ease ?

Access content via Shortcut on iOS

- Tap **Hamburger icon (?)** from the top left

- Tap **+** **icon** to add a Shortcut

- Search the popular streaming channel will appear. Look for your desired streaming channel and add it. (In this example we have used Netflix)

PureVPN Support will be asked to select location. As Netflix is a regional based content so you can choose different locations that is supported by PureVPN. (In this example we have used United States as a location)

- Lastly, PureVPN will by default suggest a name for the shortcut. If you would like to change it you can certainly change it and rename it.
- Once done tap **Add Shortcut**

You will now be able to see the newly added shortcut in the location list.

• To add more shortcut tap + icon again and repeat the above procedure.

• To connect, you may simply tap the newly created shortcut and it will start connecting.

- You are now connected to the newly created shortcut.

- After a few seconds, the selected streaming website will open up in your default browser. You may simply login to the streaming website and access it.
