

How to Change DNS on QNAP

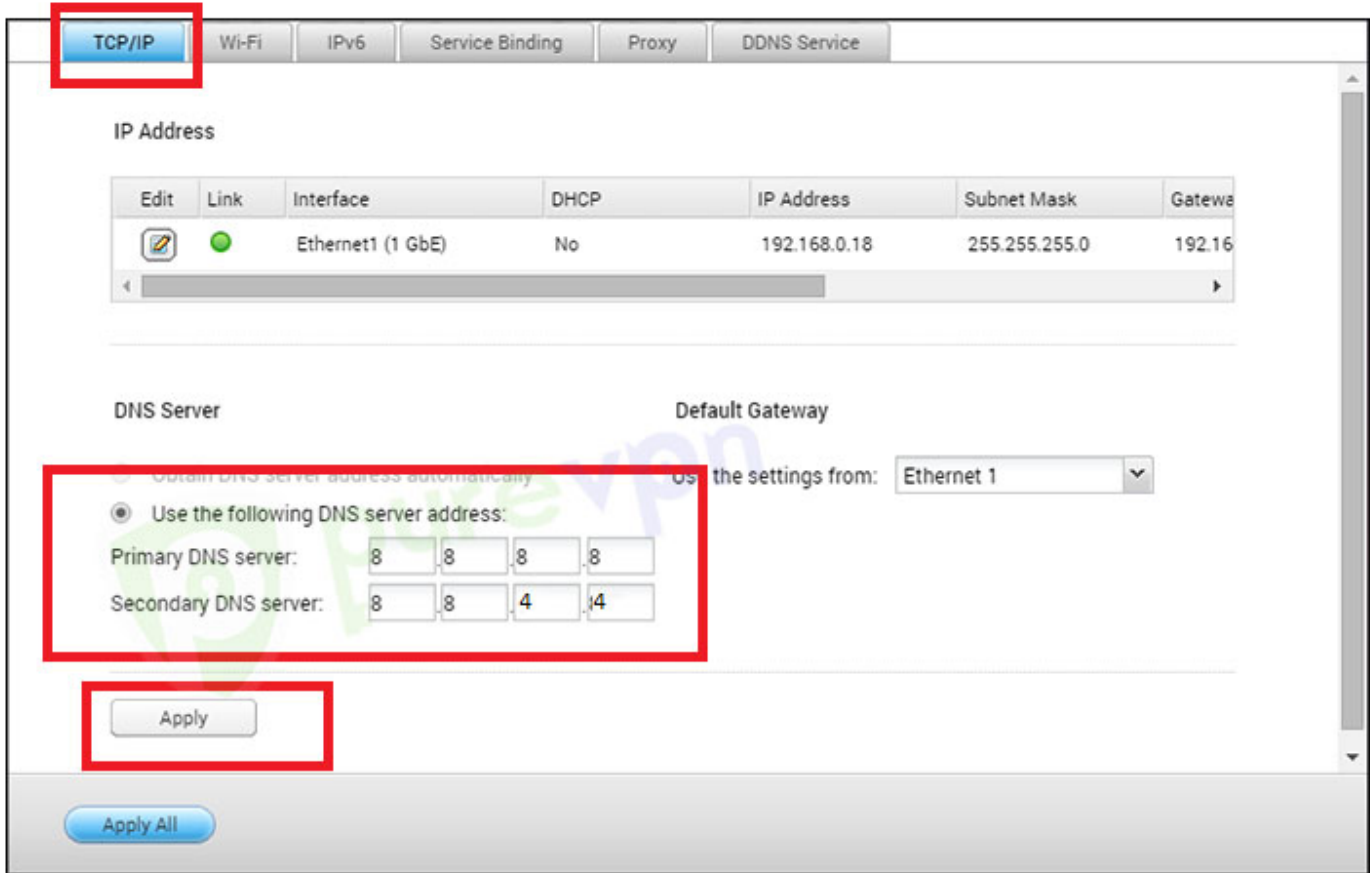

QNAP is a Taiwanese corporation specialized in providing NAS solutions to meet a wide range of user requirements, including file sharing, virtualization, storage management, and surveillance applications.

Here is how you can change the DNS on QNAP

1. Open Control Panel, click System Settings and choose Network.

2. Click 'TCP/IP', select the option 'Use the following DNS server addresses' and insert 8.8.8.8 in Primary and 8.8.4.4 in Secondary DNS Box. Click Apply to save settings.

If you encounter any issues while changing the DNS on your QNAP then please report it via the comments section below or get in touch with our 24x7 live chat support.
