

Does VPN Slow Down the Internet?

The following is a guide to help you understand whether your VPN slows down your internet speed or not

Instead of claiming big like every other VPN provider, we would like to be completely honest with you. We cannot answer in yes or no without testing PureVPN on your system with the most suitable settings.

But VPN may slow down your connection a bit depending on the selected protocol and other configurations.

In case you experience slow speed, we have several tools to speed up your browsing and streaming, such as server recommendation tool. [Here is a complete Guide to Increase your VPN Speed.](#)

So let us hear you, we are here to make your internet experience securer and faster.

Please use the comment box for your suggestions & feedback. For additional help, please submit [support ticket](#) with errors and screen shots (if possible) or contact our 24/7 live chat.
