

How to access Popular Websites in PureVPN Windows App

We have introduced a dedicated list of the most popular websites that can be streamed. Here's how to access it on PureVPN's Windows client.

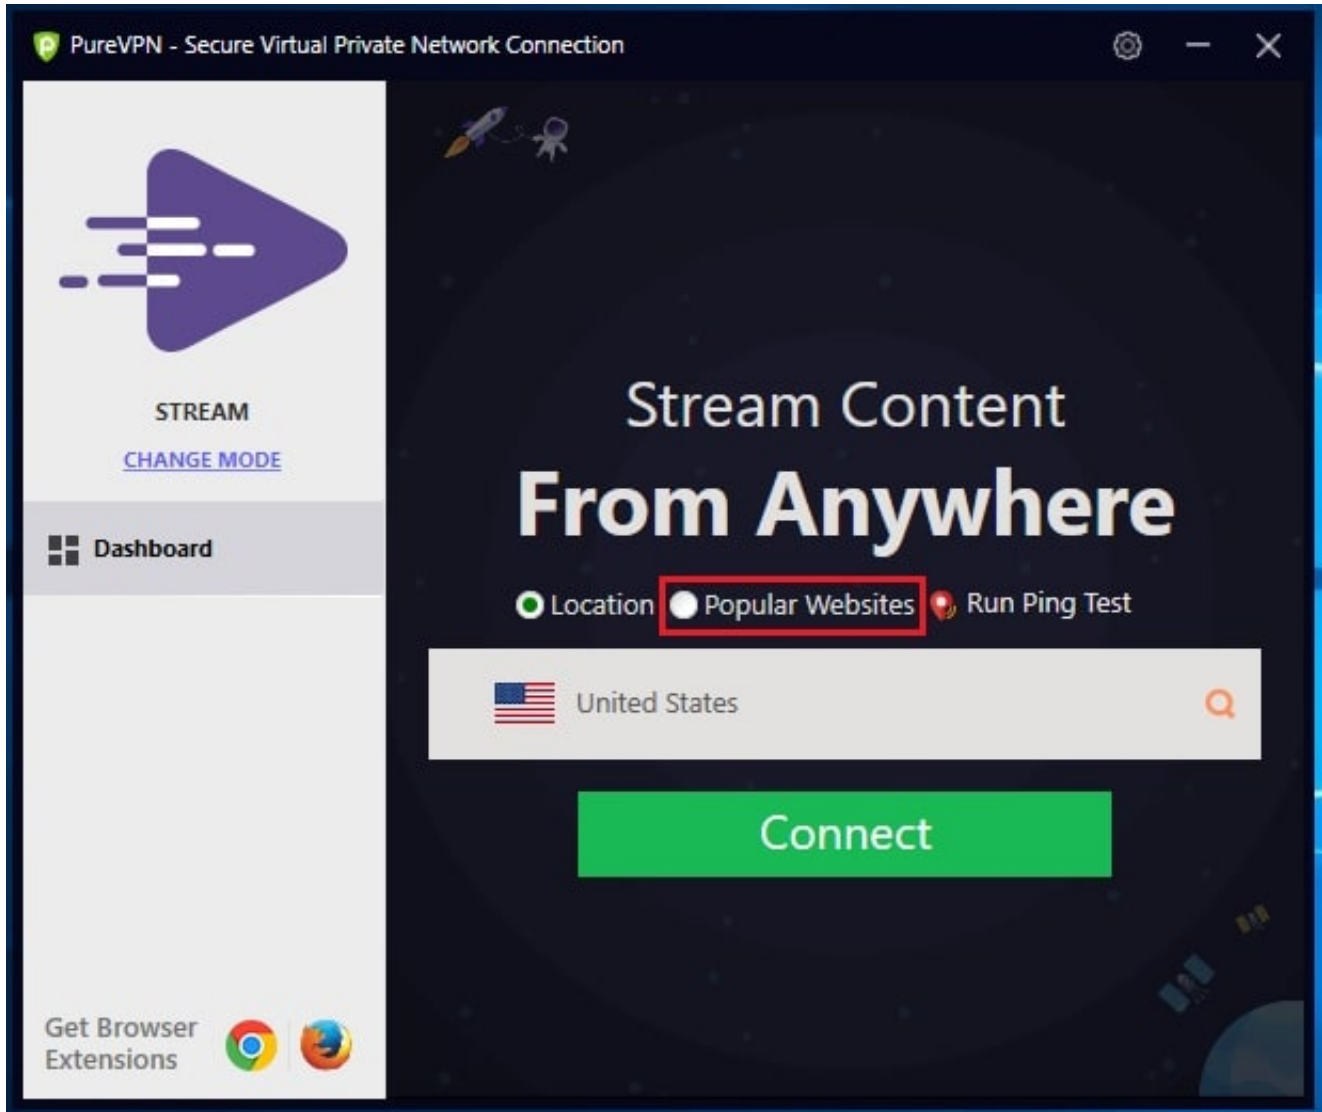

1 Click Change Mode from the dashboard.

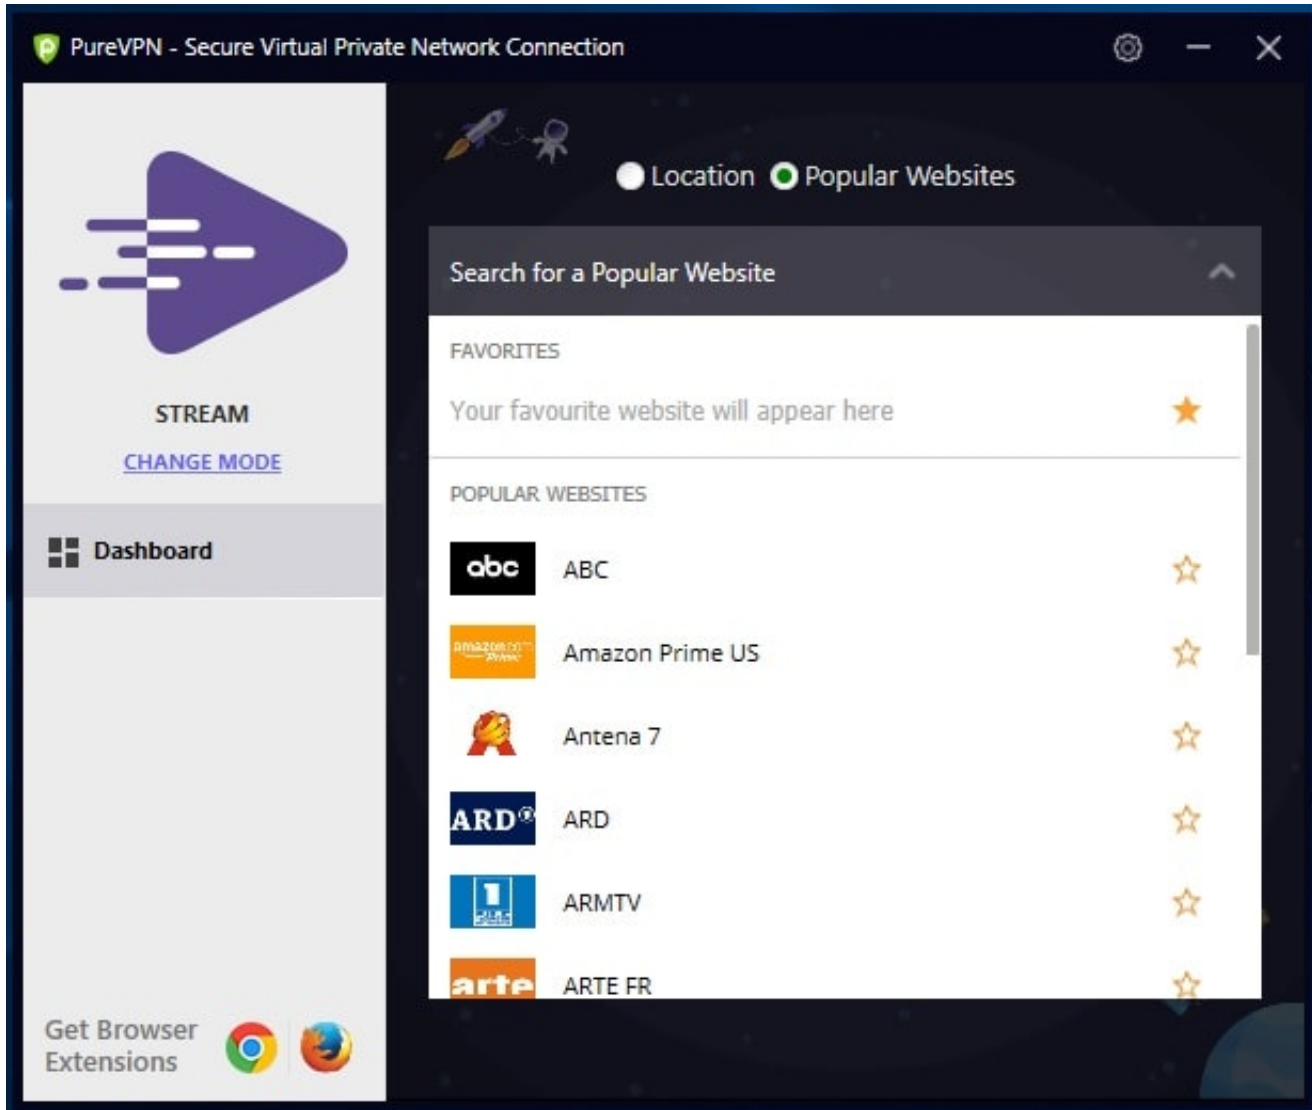

2 Click **Stream**.

3 Click the **Popular Websites** option.

4 Select the website that you wish to access.

5 You are now connected!

The screenshot displays the PureVPN web interface. At the top, the title bar reads "PureVPN - Secure Virtual Private Network Connection". The main content area features a large purple play button icon with the text "STREAM" and a "CHANGE MODE" link below it. To the right, there is a Facebook promotion banner that says "JOIN US ON FACEBOOK" and "We Have a 100% Response Rate!" with a "Like Us" button and a "SHOW GRAPH" link. Below this, a white box with the heading "YOUR REAL IP IS NOW HIDDEN" contains a list of features and their status:

Restricted Websites	Unblocked
Fast Streaming	Enabled
ISP Speed Throttling	Disabled
Private Browsing	Enabled
Stream	ABC

At the bottom of the interface, there is a large orange "Disconnect" button. Below it, a green clock icon indicates "Duration: 00:00:00" and a link to "Fetch my VPN IP". On the left side, there is a "Dashboard" menu item and a "Get Browser Extensions" section with icons for Chrome and Firefox.
