

How to Change Mode in PureVPN Windows App

To make things easier for users, PureVPN gives you a selection of innovative modes to use. Learn how to change modes and enjoy the best possible VPN experience.

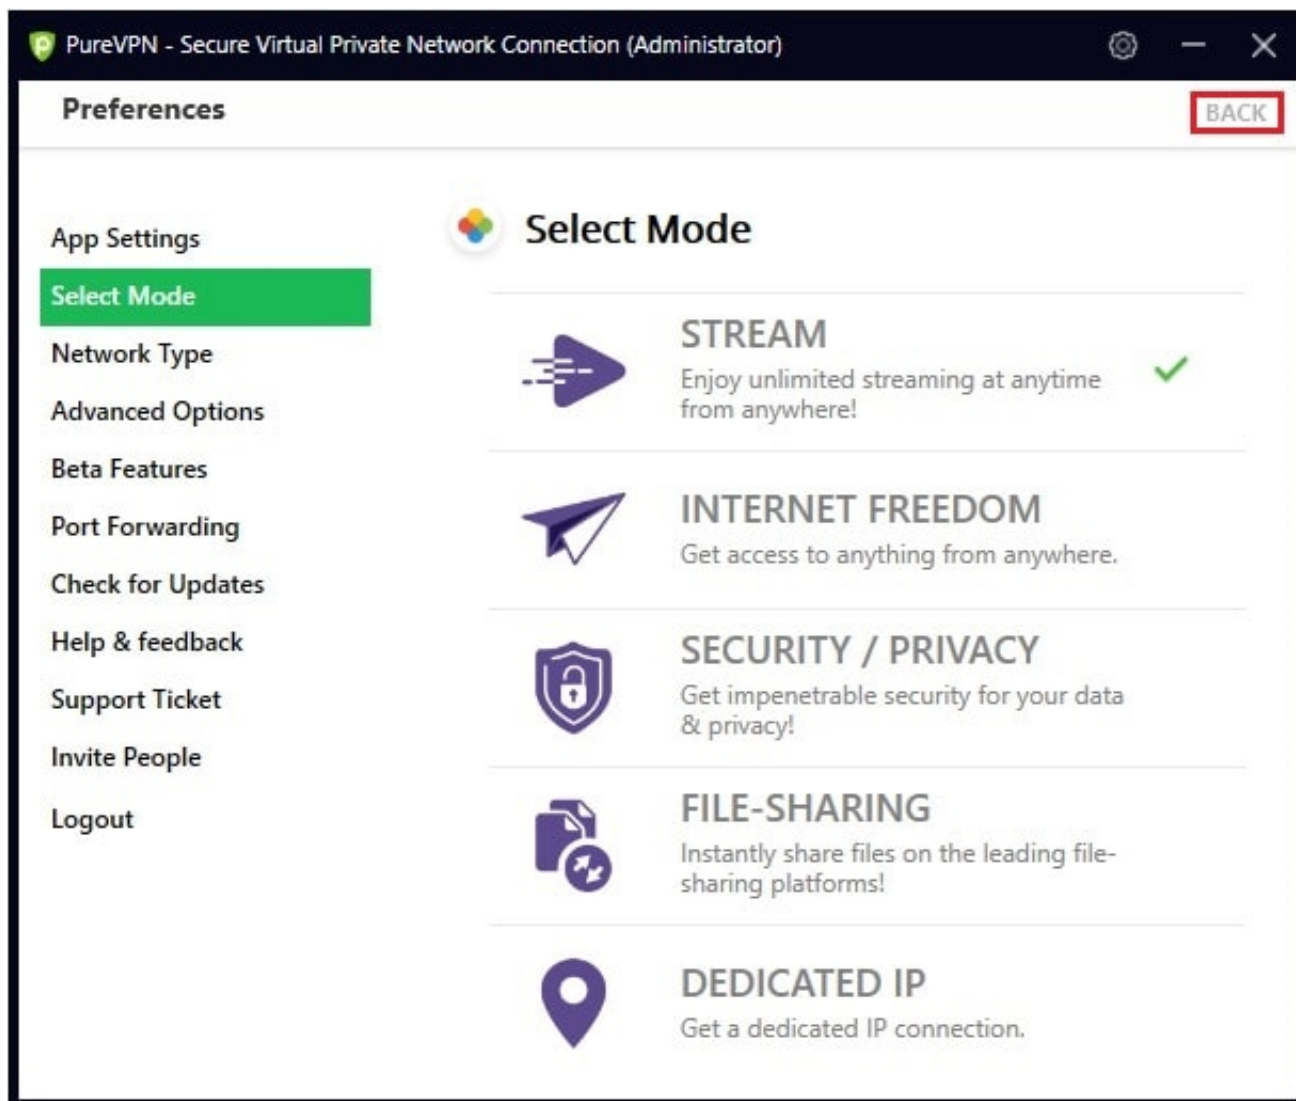

1 Click Change Mode.

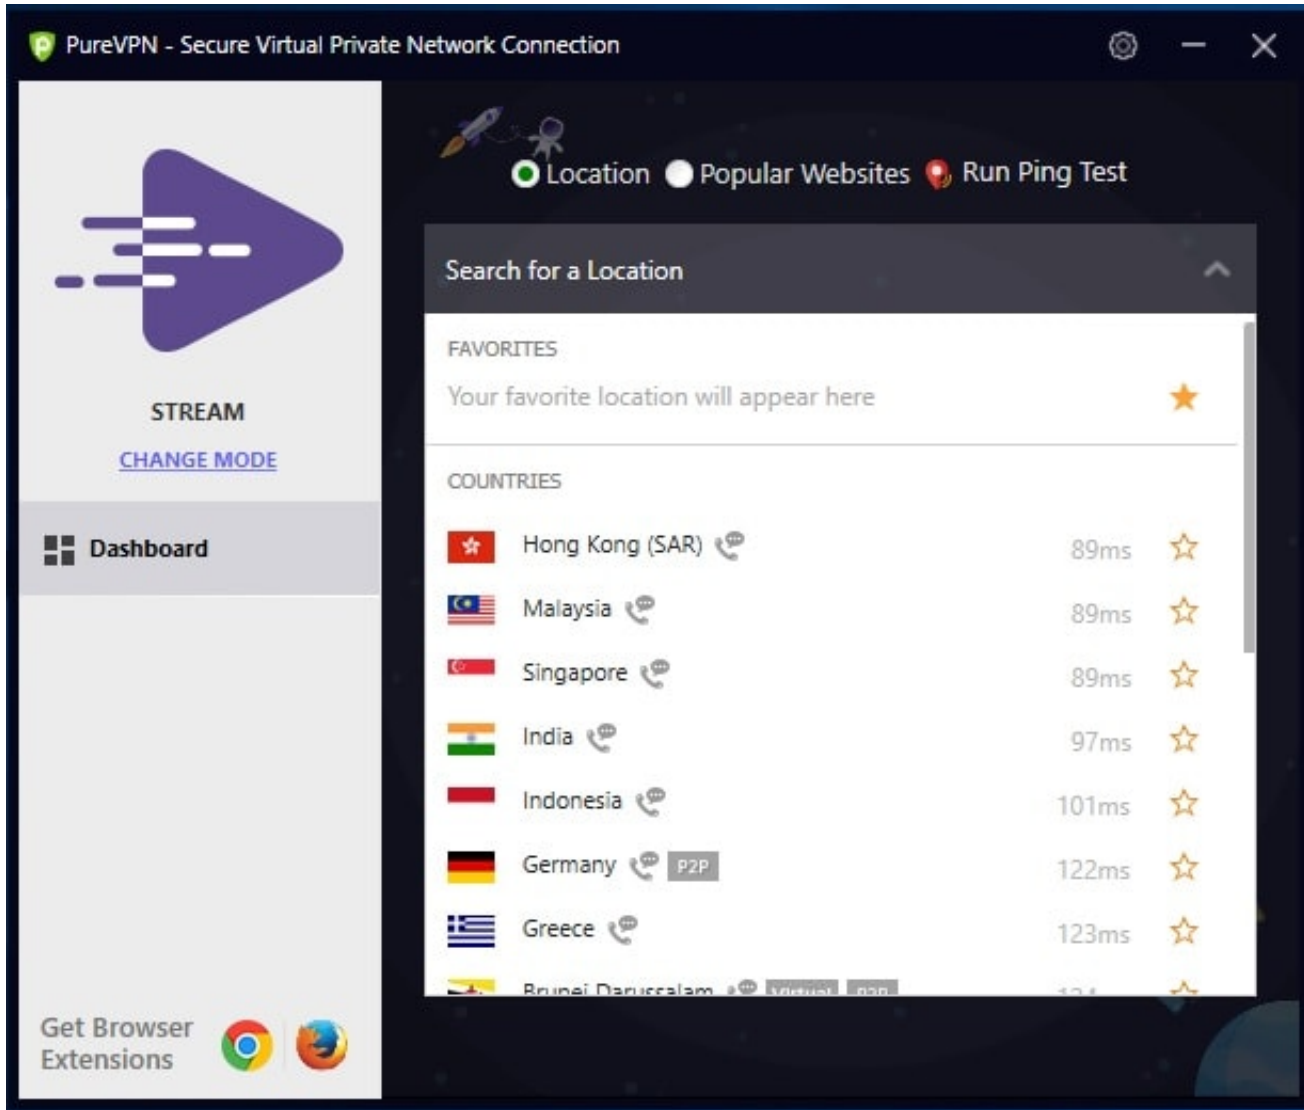

2 Choose your desired mode.

3 Click Back.

4 Connect to the location you wish.

5 You are now connected with your desired mode!

The screenshot shows the PureVPN desktop application interface. The title bar reads "PureVPN - Secure Virtual Private Network Connection". On the left is a sidebar with a "Dashboard" button and "Get Browser Extensions" for Chrome and Firefox. The main area features a "STREAM" mode selector with a "CHANGE MODE" link. A top banner promotes Facebook with a "Like Us" button and "SHOW GRAPH" link. The central section displays "YOUR REAL IP IS NOW HIDDEN" and a list of settings:

Restricted Websites	Unblocked
Fast Streaming	Enabled
ISP Speed Throttling	Disabled
Private Browsing	Enabled
Location	★ United States

At the bottom, there is a large orange "Disconnect" button, a "Duration: 00:00:03" timer, and a "Fetch my VPN IP" link.
