

How to configure PureVPN on Mofi 4500 Router

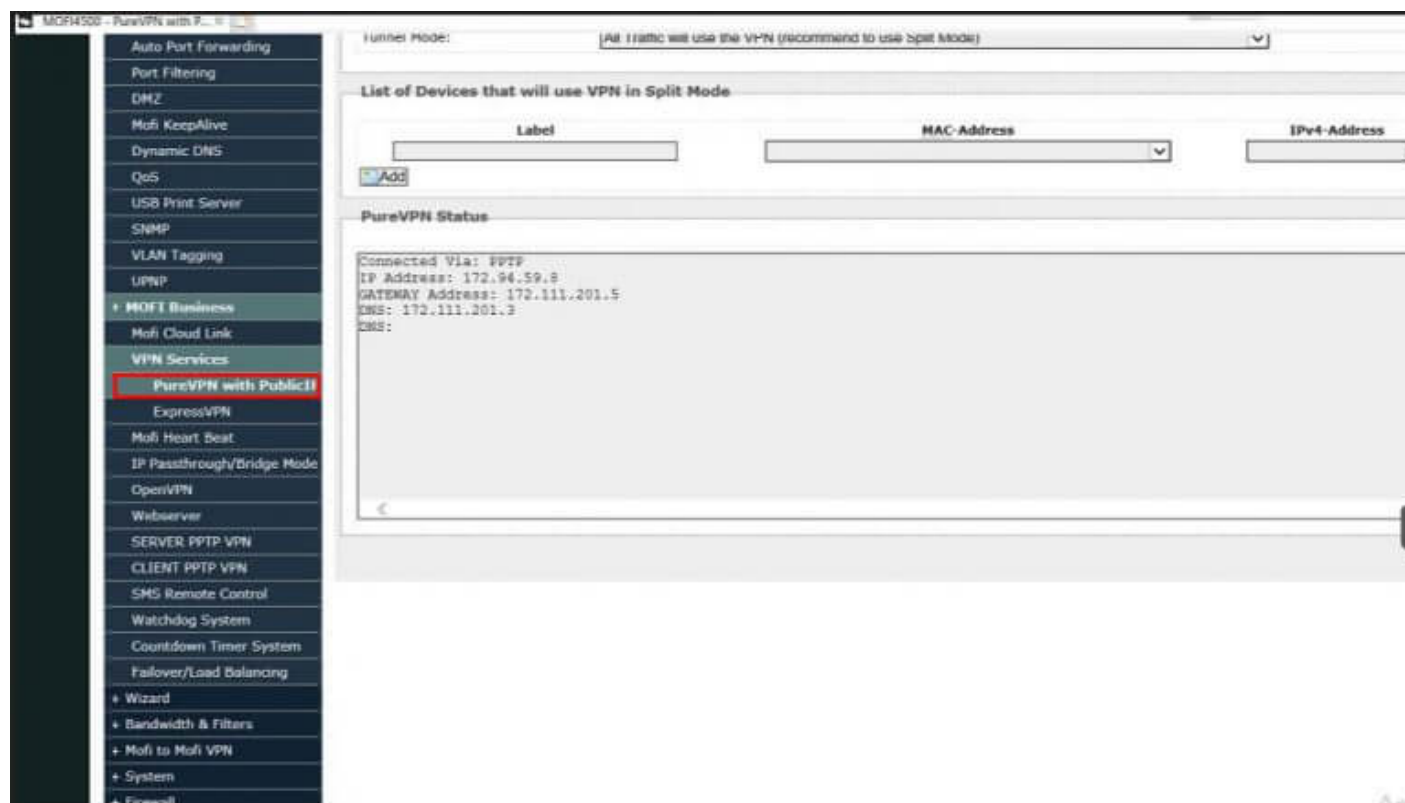

Want to configure PureVPN on your Mofi router for your home or office network? Here's a step-by-step guide for you to follow.

Things to Consider:

Before you begin, please make sure that:

- You have a working internet connection
- VPN Supported Router.
- Own a premium PureVPN account (If you do not already own one, you can buy a subscription from [here](#))

1 Open your browser and go to router's configuration page. Now, click PureVPN with PublicIP.

2 Check the Enable PureVPN box and enter Username, Password, and Server address in their respective fields.

3 Then, set IP-Passthrough to ON.

4 Hit the Save button and your connection details will be shown instantly under PureVPN Status.
