

How to connect Firefox Extension in Private Window

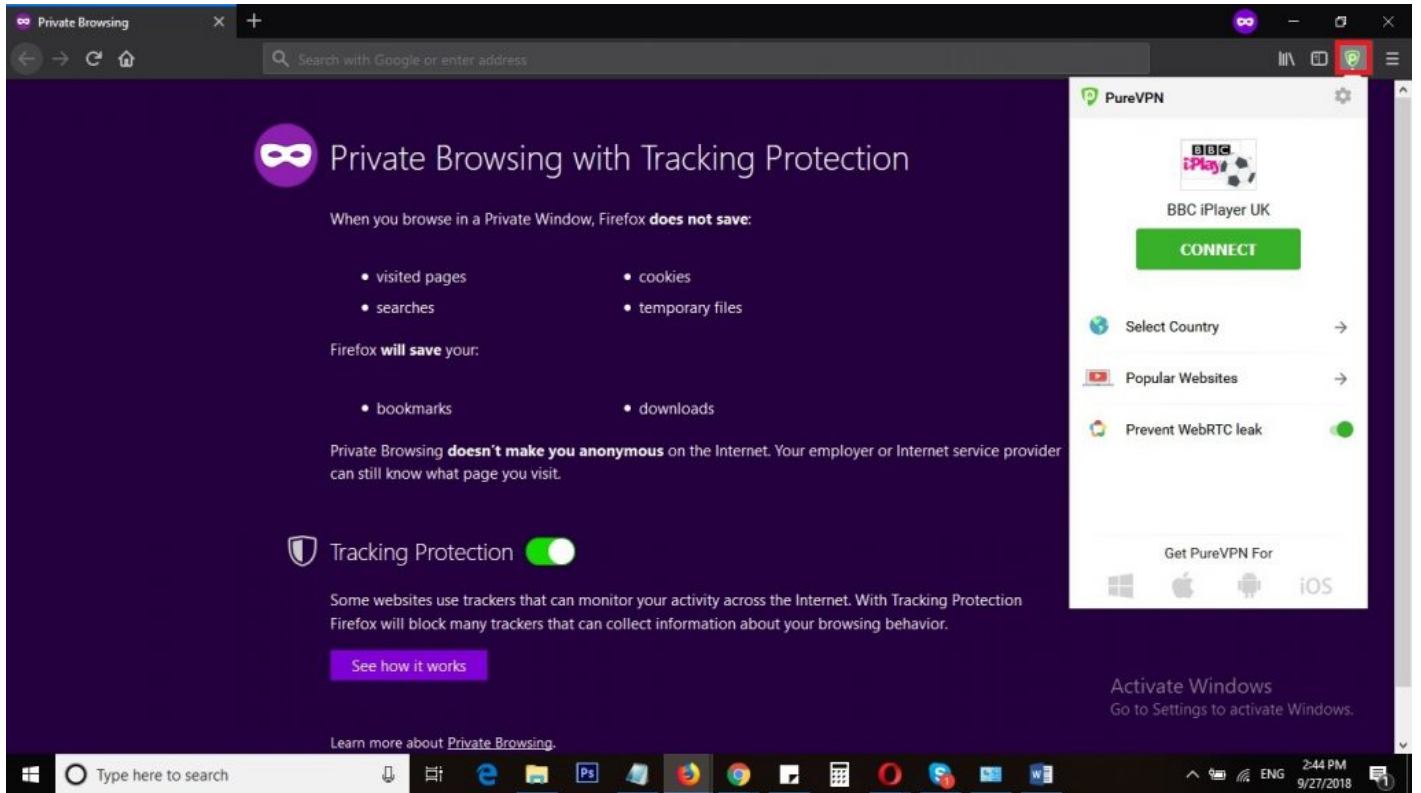

A step-by-step guide on how to allow PureVPN's Extension for Firefox in private window.

1 Open your browser and then use the **Ctrl + Shift + P** key combination to open a private tab *OR* simply go to **Firefox menu** and select the option of **New Private Window**.

For OSX users: **up arrow + CMD + P**

2 Once your private tab is open, click **PureVPN Firefox Extension** icon and select the country you want to connect to.

3 You are now connected and can browse more securely on a private window with PureVPN.

The screenshot shows a Firefox Private Browser window. The main content area displays the 'Private Browsing with Tracking Protection' page. It lists items that Firefox does not save (visited pages, searches, cookies, temporary files) and items it will save (bookmarks, downloads). A 'Tracking Protection' toggle is turned on. A 'PureVPN' extension is visible in the top right corner of the browser, showing the United States flag, a 'DISCONNECT' button, and options to 'Select Country', 'Popular Websites', and 'Prevent WebRTC leak'. The Windows taskbar is visible at the bottom, showing the search bar and various application icons. The system tray shows the date and time as 2:45 PM on 9/27/2018.

Private Browsing

Search with Google or enter address

Private Browsing with Tracking Protection

When you browse in a Private Window, Firefox **does not save**:

- visited pages
- searches
- cookies
- temporary files

Firefox **will save** your:

- bookmarks
- downloads

Private Browsing **doesn't make you anonymous** on the Internet. Your employer or Internet service provider can still know what page you visit.

Tracking Protection

Some websites use trackers that can monitor your activity across the Internet. With Tracking Protection Firefox will block many trackers that can collect information about your browsing behavior.
