

## How to Disable IPv6 on MAC?

Want to know how to disable IPV6 on Mac? Well, IPV6 can be directly disabled through your Mac Network settings (depends on the Mac version). Below is the guide how to disable or turn off IPv6 on Mac:

- Choose System Preferences from the Apple menu

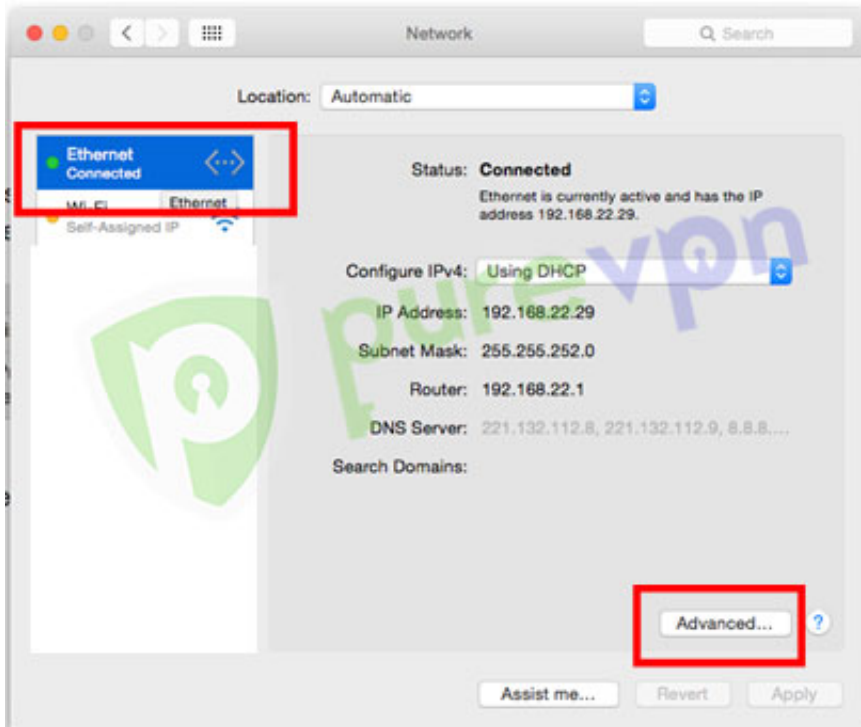

- Click the Network icon in the System Preferences window.

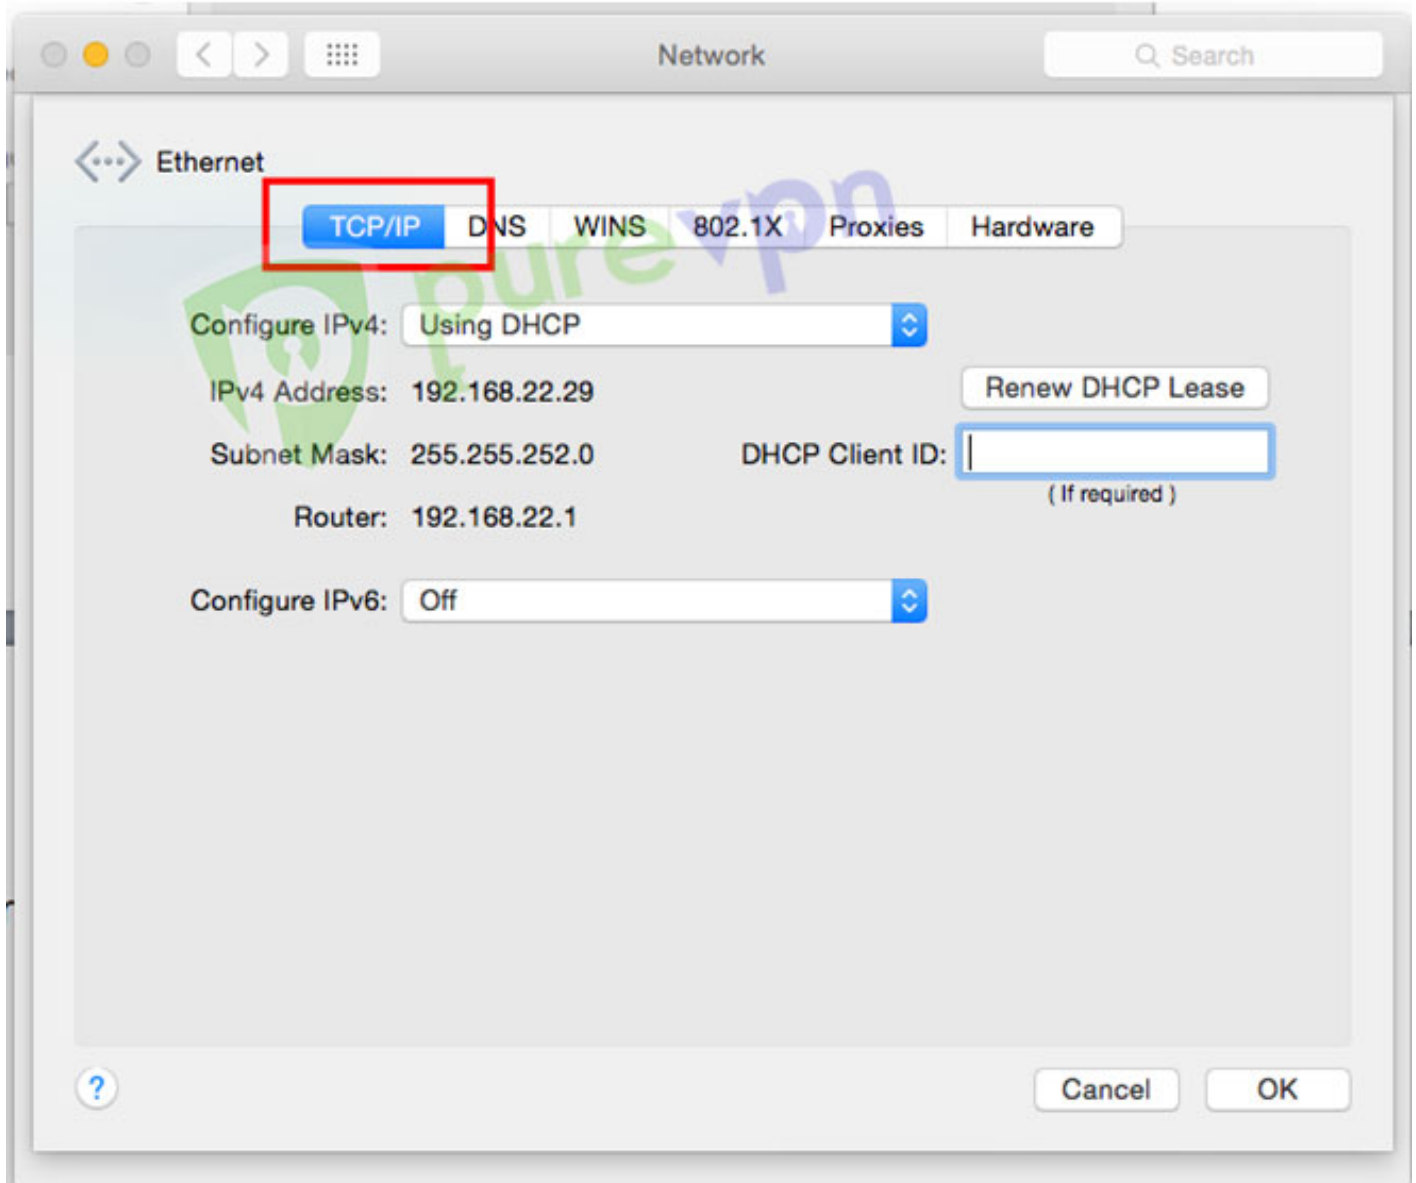

- Insert the following info:
  1. Click on "Ethernet" or "AirPort".

## 2. Click Advanced

- From TCP/IP tab, click on Configure IPv6 drop down menu and select Off, then click OK and you are done.
