

## How to Setup PureVPN on Freebox

Having the ability to be used as a seedbox (250go HDD), the Freebox V6 is the most advanced ISP box available in France. Couple that with an FTP and Newsgroup client, and you have a powerful content-accessing machine in your hands.

### How to Setup Freebox VPN

You can make the most of your ISP box with PureVPN. Learn how you can configure PureVPN on your Freebox using the PPTP or OpenVPN protocol.

Find your VPN credentials for manual configuration.

To find your VPN credentials log into the PureVPN members area. Click ? [here](#) to visit member area.

- Login to the **Member area** using your PureVPN registered email address and password.

- On Subscription tab scroll down to be able to view your **VPN credentials**

- You will be able to see and copy your VPN credentials.
- Note down your PureVPN username and click the **Eye icon** to make your password visible and use it in the manual configuration.

## Freebox (PPTP)

Please note that this tutorial is based on Freebox OS 2.1.

- Connect to [link](#) from the local network (Wifi, CPL or Ethernet) or from an external network
- Enter password
- Click **Parametres de la Freebox** in the user interface.

- Click **Mode avance** tab and then **Client VPN**

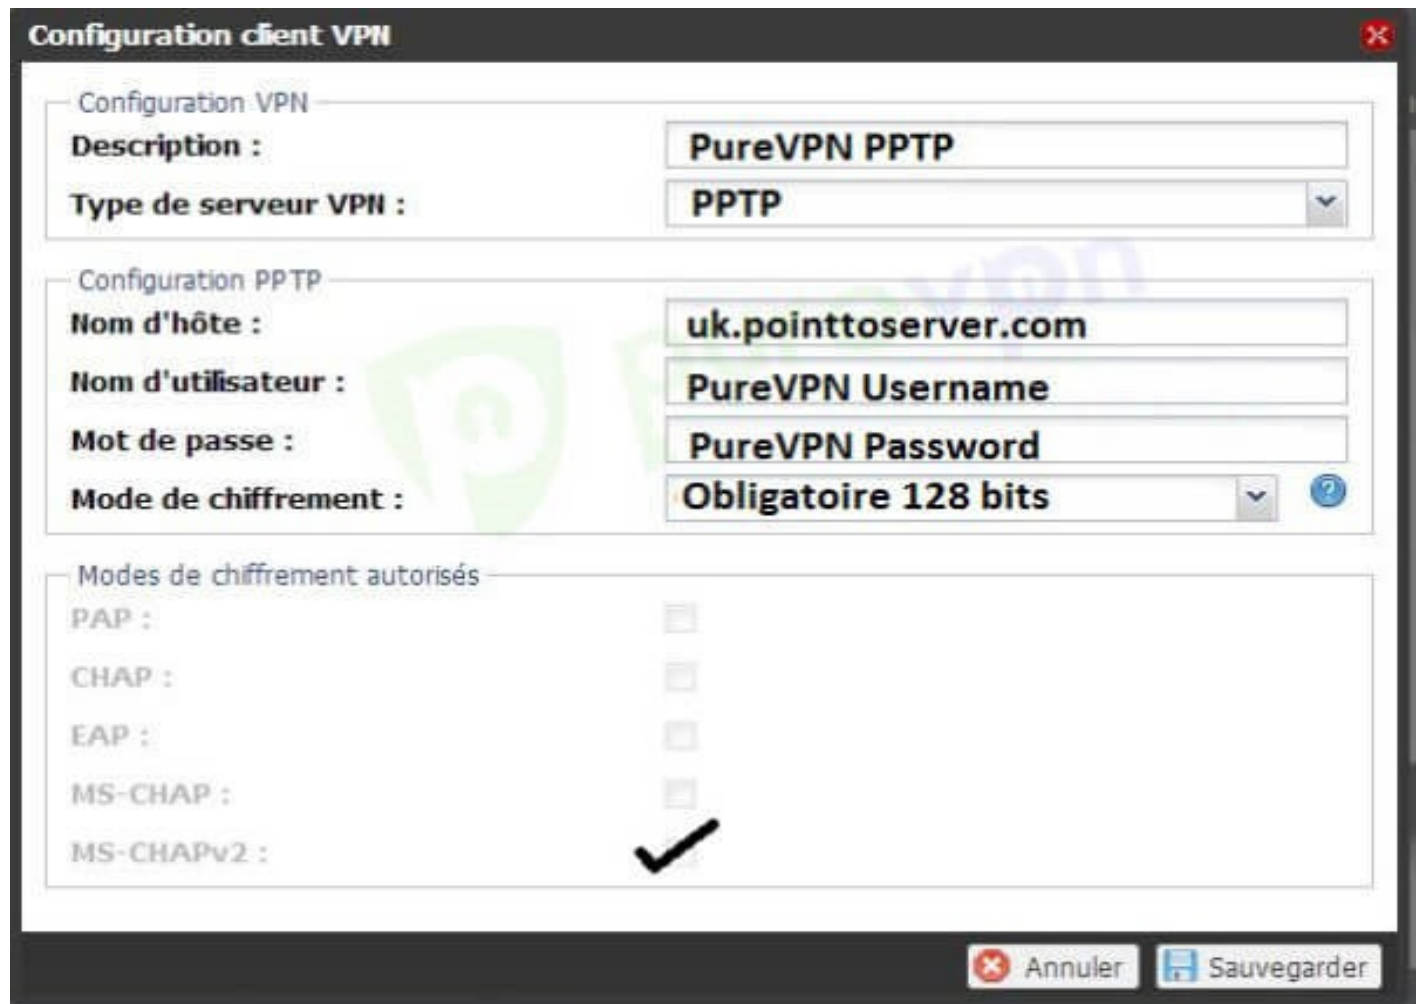

- Go to the **Configuration VPN** tab and click Ajouteruneconnexion
- Description can be anything you want such as PureVPN PPTP.
- Type de serveur VPN (VPN server type): Choose PPTP from the drop-down menu
- Nom d'hôte (Hostname): Enter your Gateway (PPTP server) (Use the server provided in the above note)
  1. Germany: de1.pointtoserver.com
  2. Netherlands: nl1.pointtoserver.com
  3. United Kingdom: ukl1.pointtoserver.com
  4. United States: usil1.pointtoserver.com
  5. United States: ustx1.pointtoserver.com
  6. United States: usca1.pointtoserver.com
  7. United States: usfl1.pointtoserver.com
  8. United States: usny1.pointtoserver.com
  9. United States: uswdc1.pointtoserver.com
  10. Australia: au-sd1.pointtoserver.com

## PureVPN Support

Solution of Your Problems

<https://support.purevpn.com>

- Nom d'utilisateur Mot de passe. Enter your PureVPN credentials. Here is how you can [find your VPN credentials](#).
- Mode de chiffrement (Encryption mode): Choose 128 bits and check MS-CHAPv2

The screenshot shows a window titled "Configuration client VPN" with a close button in the top right corner. The window is divided into three sections:

- Configuration VPN:** Contains a "Description" field with the value "PureVPN PPTP" and a "Type de serveur VPN" dropdown menu set to "PPTP".
- Configuration PPTP:** Contains four fields: "Nom d'hôte" with "uk.pointtoserver.com", "Nom d'utilisateur" with "PureVPN Username", "Mot de passe" with "PureVPN Password", and "Mode de chiffrement" dropdown set to "Obligatoire 128 bits".
- Modes de chiffrement autorisés:** A list of encryption modes with checkboxes: PAP, CHAP, EAP, MS-CHAP, and MS-CHAPv2. The MS-CHAPv2 checkbox is checked, indicated by a large black checkmark.

At the bottom right of the window, there are two buttons: "Annuler" (Cancel) and "Sauvegarder" (Save).

## Freebox (OpenVPN)

To establish an OpenVPN connection, please click [this link](#) and download the VPN configuration files:

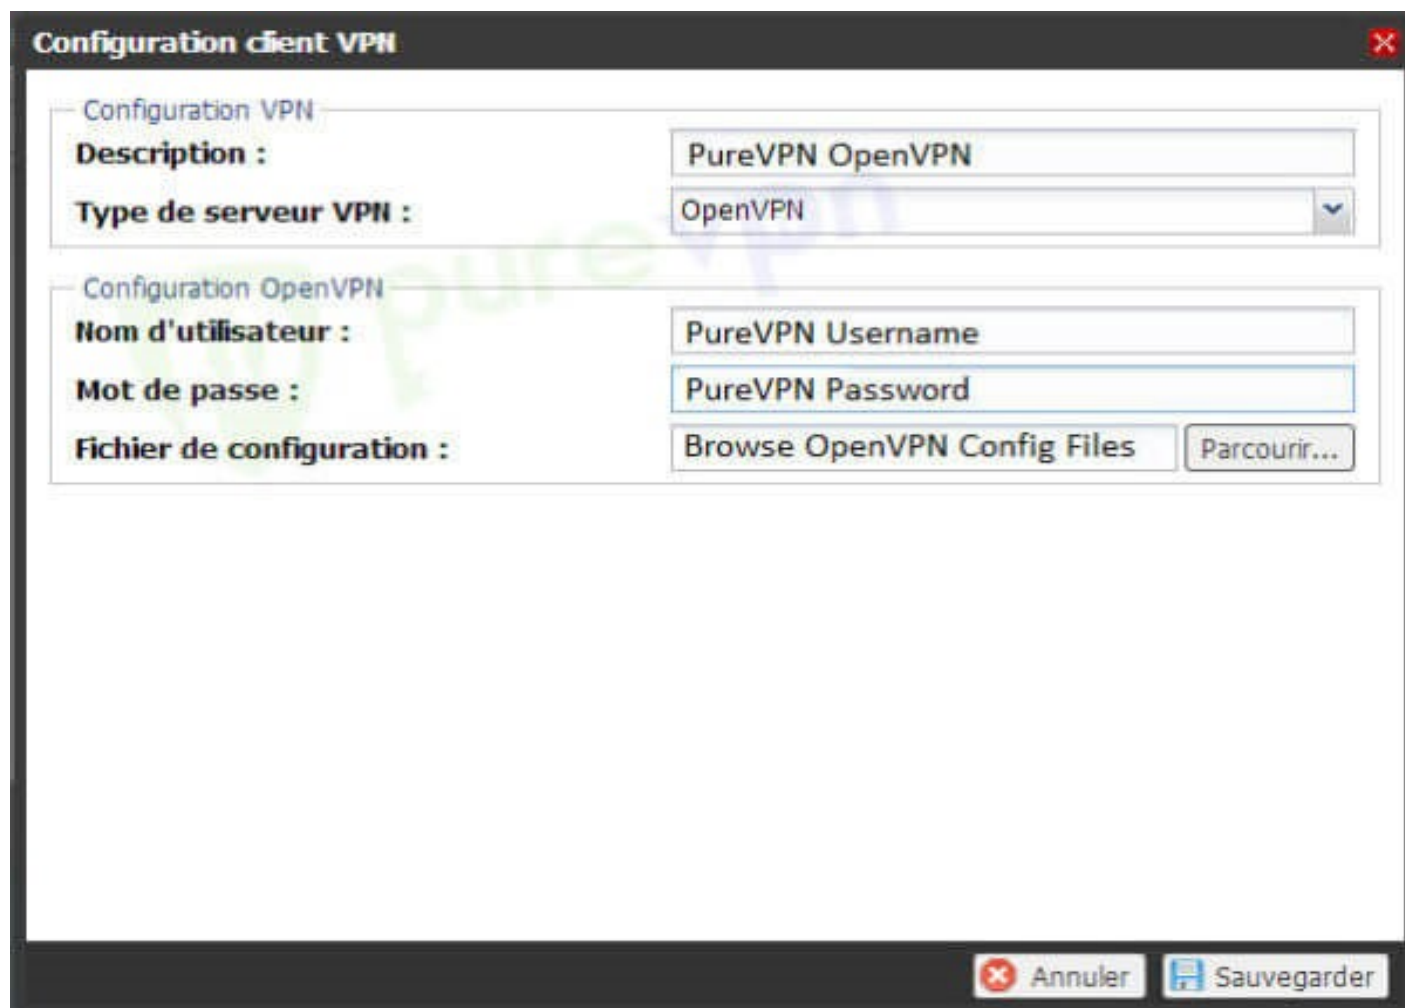

- To configure the OpenVPN connection, please unzip openvpn files first.

Description: As per your choice e.g. PureVPN OpenVPN

Type de serveur VPN (VPN server type): Go to the drop-down menu and choose OpenVPN.

Nom d'utilisateur Mot de passe. Enter your PureVPN credentials. Here is how you can [find your VPN credentials](#).

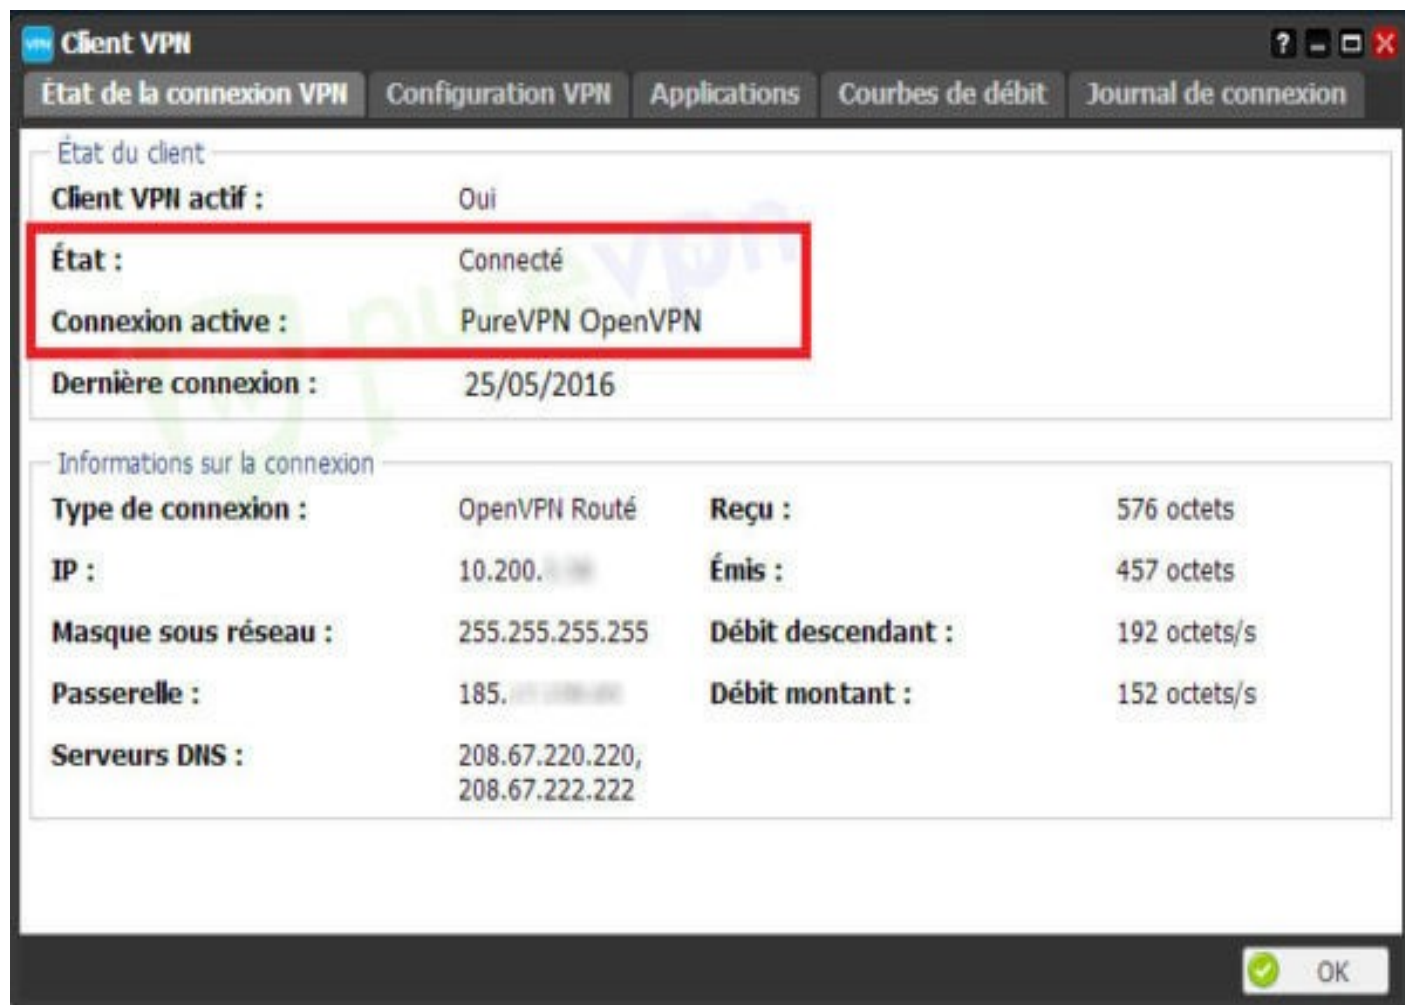

Fichier de configuration (Configuration File): Click on Parcourir and browse for the VPN config.zip file you downloaded and unzipped earlier. Choose either UDP or TCP files and select a server file that you wish to connect to.

The screenshot shows a window titled "Configuration client VPN" with a close button in the top right corner. The window is divided into two main sections. The first section, "Configuration VPN", contains a "Description" field with the text "PureVPN OpenVPN" and a "Type de serveur VPN" dropdown menu currently set to "OpenVPN". The second section, "Configuration OpenVPN", contains a "Nom d'utilisateur" field with "PureVPN Username", a "Mot de passe" field with "PureVPN Password", and a "Fichier de configuration" field with a "Browse OpenVPN Config Files" button and a "Parcourir..." button. At the bottom of the window, there are two buttons: "Annuler" (Cancel) and "Sauvegarder" (Save).

- To check whether the connection has established or not, go to the **Etat de la connexion VP** tab, to verify.

The screenshot shows the 'Client VPN' application window. The title bar includes a help icon, minimize, maximize, and close buttons. Below the title bar are five tabs: 'État de la connexion VPN', 'Configuration VPN', 'Applications', 'Courbes de débit', and 'Journal de connexion'. The 'État de la connexion VPN' tab is selected, displaying the 'État du client' section. This section contains the following information:

- Client VPN actif :** Oui
- État :** Connecté
- Connexion active :** PureVPN OpenVPN
- Dernière connexion :** 25/05/2016

Below this is the 'Informations sur la connexion' section, which displays connection details in two columns:

<b>Type de connexion :</b>	OpenVPN Routé	<b>Reçu :</b>	576 octets
<b>IP :</b>	10.200.1.10	<b>Émis :</b>	457 octets
<b>Masque sous réseau :</b>	255.255.255.255	<b>Débit descendant :</b>	192 octets/s
<b>Passerelle :</b>	185.199.108.100	<b>Débit montant :</b>	152 octets/s
<b>Serveurs DNS :</b>	208.67.220.220, 208.67.222.222		

At the bottom right of the window, there is a green checkmark icon and an 'OK' button.
