

## How to Setup PureVPN Manually on iPhone (L2TP) ?

L2TP is an excellent choice for using VPN as it provides the perfect balance between security and performance. Its support for popular desktop and mobile operating systems makes it one of the most suitable VPN protocol out there. Here's how to setup PureVPN manually on iPhone with L2TP protocol:

### Things to Consider:

Before you begin, please make sure that:

- You have a working internet connection
- An iOS device (Smartphone, Tablet etc.)
- A Premium PureVPN account (if you haven't bought yet [click here](#) to buy)

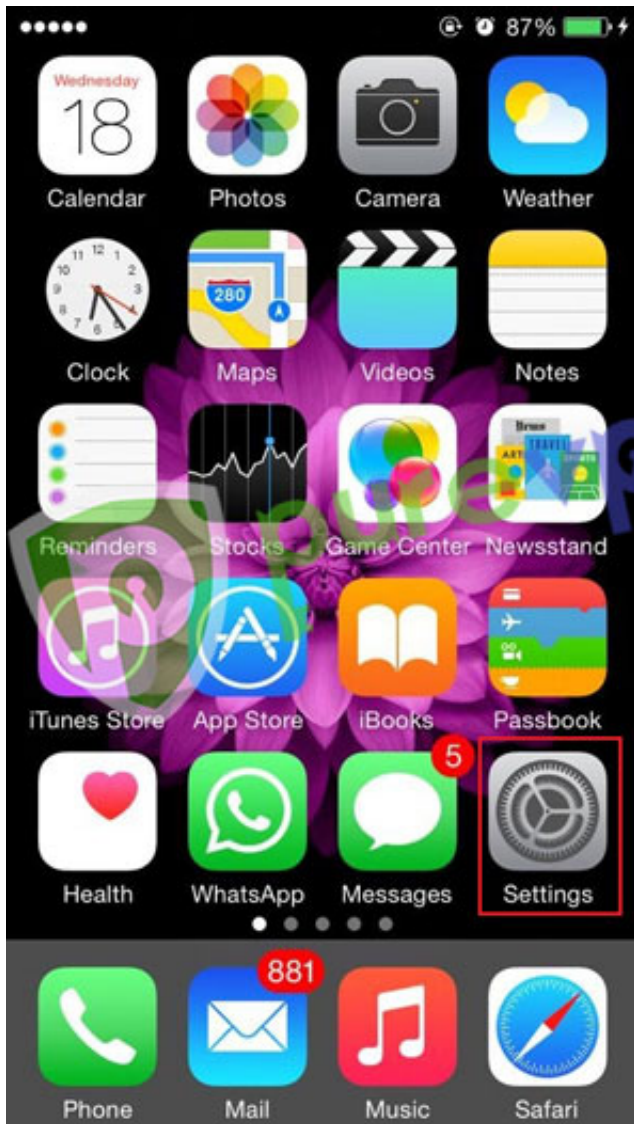

**1** Go to your home screen and tap on "**settings**"

---

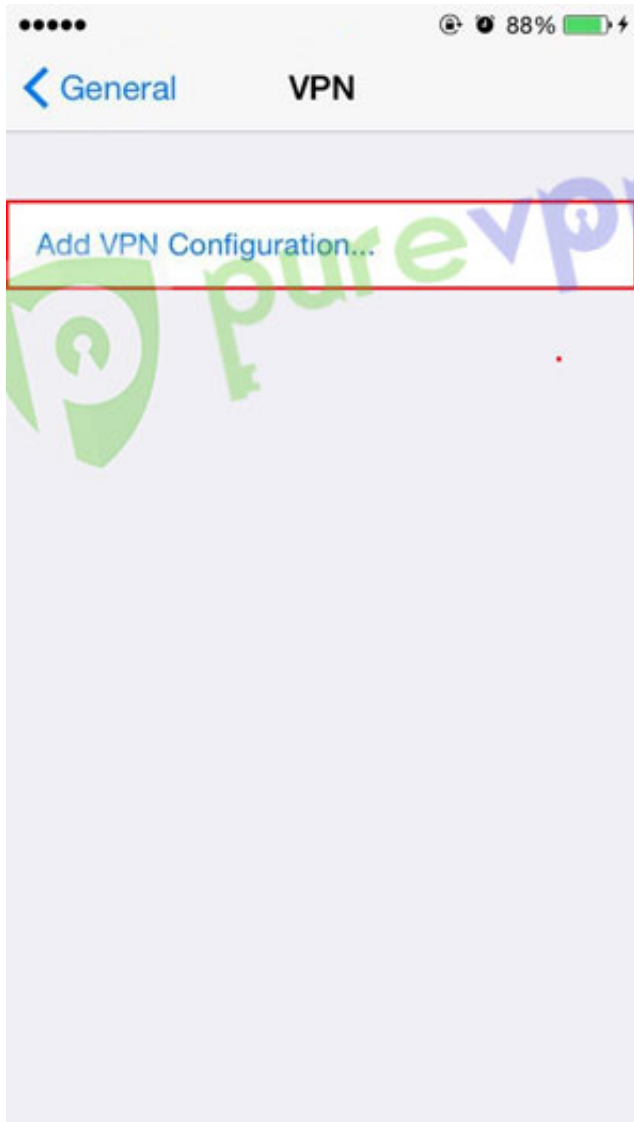

2 Tap on “General”

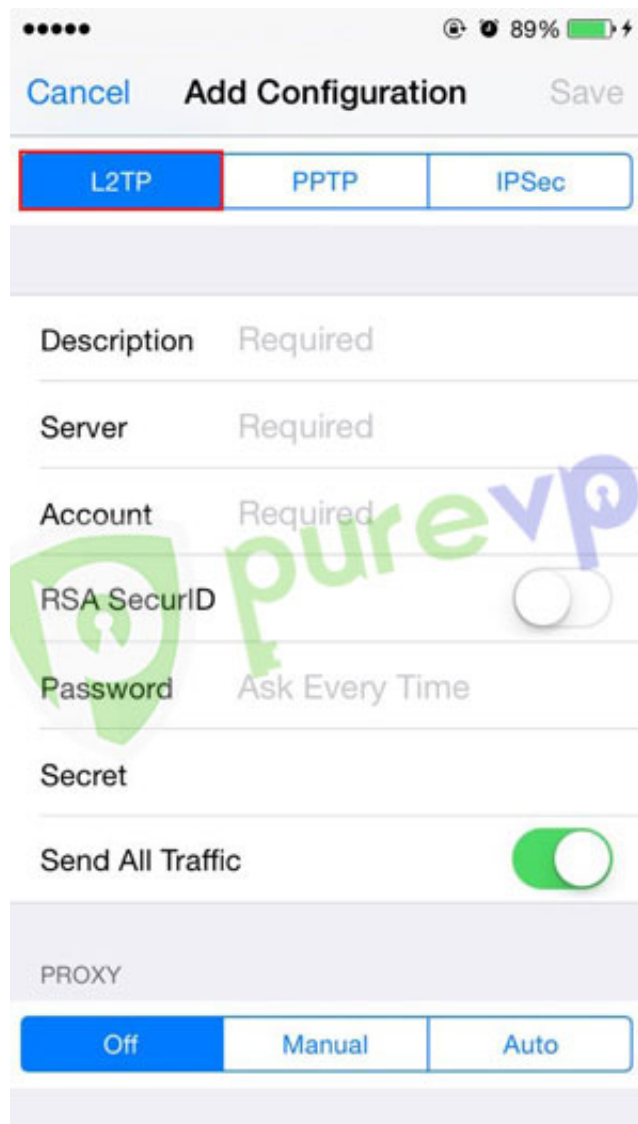

**3** Tap on "VPN"

**4** Tap on Add “VPN configuration”

**5** Tap on “L2TP Protocol”

The screenshot shows the 'Add Configuration' screen for L2TP on an iPhone. At the top, there are three buttons: 'Cancel', 'Add Configuration', and 'Save'. Below these are three tabs: 'L2TP' (highlighted with a red border), 'PPTP', and 'IPSec'. The main configuration area includes several fields: 'Description' (Required), 'Server' (Required), 'Account' (Required), 'RSA SecurID' (with a toggle switch), and 'Password' (set to 'Ask Every Time'). There is a 'Secret' field with a green toggle switch turned on. At the bottom, there is a 'PROXY' section with three tabs: 'Off' (highlighted), 'Manual', and 'Auto'. A large 'purevpn' watermark is visible across the center of the screen.

### 6 Insert the following info:

- Insert in description “**PureVPN L2TP**”.
- Insert PureVPN **Username** name.
- Insert desired **server** which you want to connect, [click here](#) to get the server list.
- Insert PureVPN **password**.
- Insert **12345678** in Secret box
- Now tap on “**Save**”
