

How to Setup PureVPN on HP WebOS?

Follow these steps and learn how to setup PureVPN manually on HP WebOS:

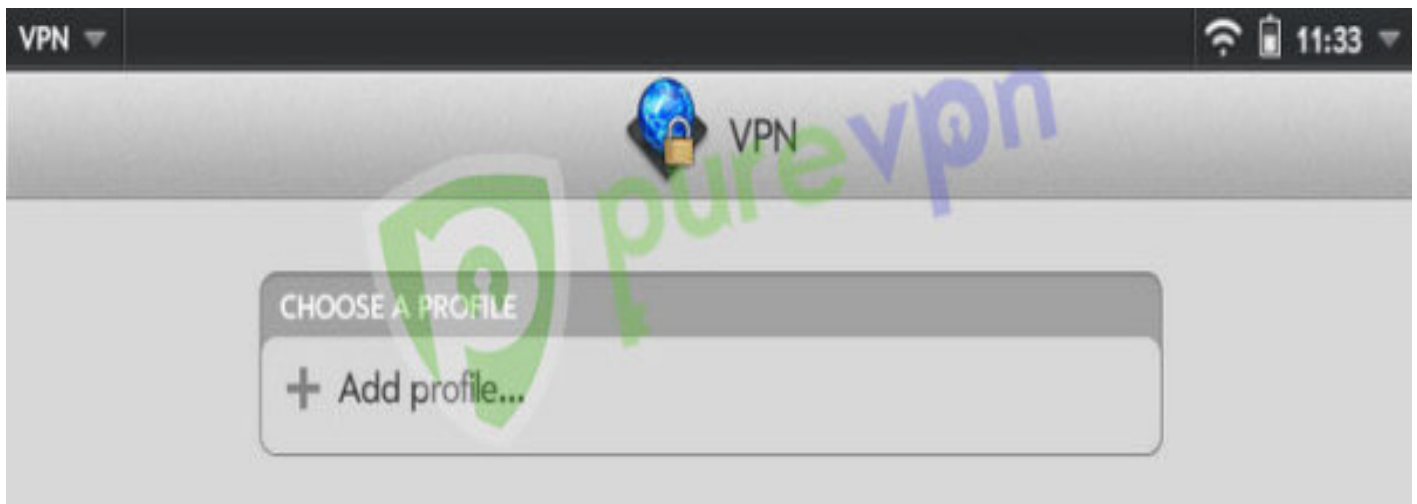

- Install **PPTP VPN Plugin** from HP App Catalog

- From Launcher go to **Settings** and Tap on **VPN**

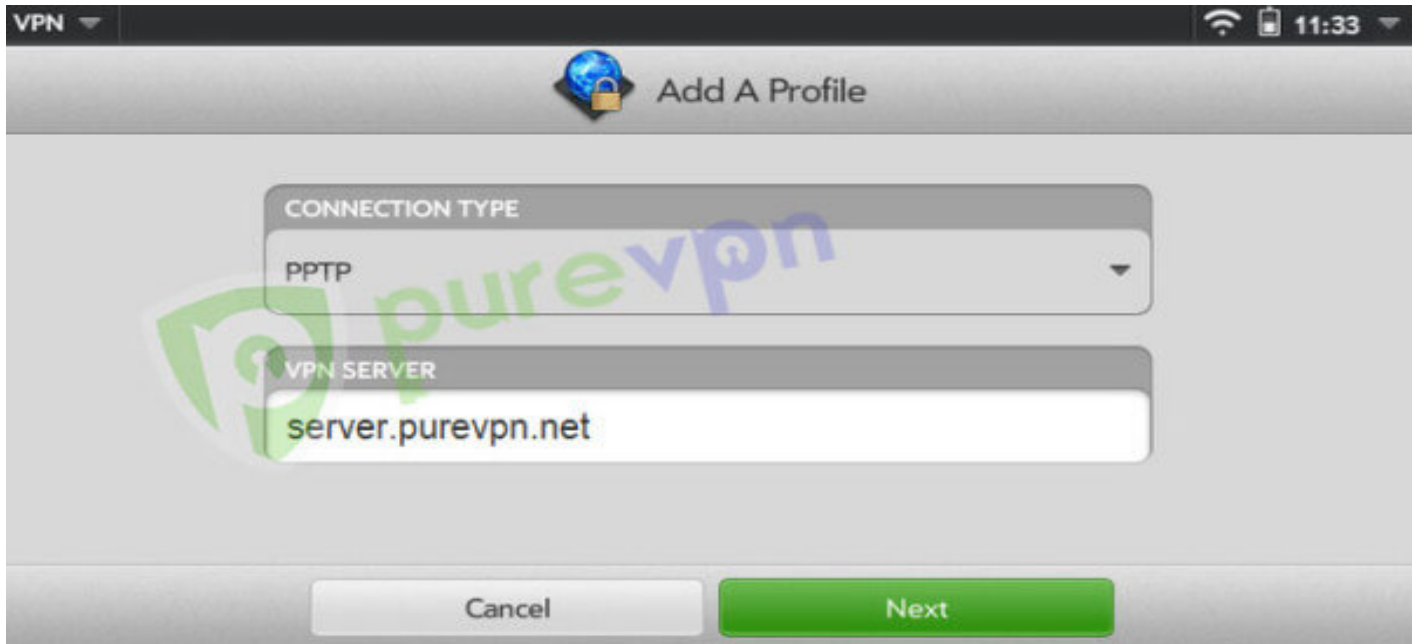

- Tap on **Add profile.....**

- **Do the following:**

1. Select **PPTP** from Connection Type
2. Insert Desired server address and tap on **Next**. Click [here](#) to get the server list.

- **Do the following:**

- Enter your PureVPN credentials. Here is how you can [find your VPN credentials](#).
- Select **MSCHAP2** and uncheck the rest and Hit **Connect**.

VPN ▾ 📶 🔋 11:33 ▾

 **Configure a Profile**

PROFILE NAME
PureVPN

VPN SERVER
server.purevpn.net

LOGIN CREDENTIALS
USERNAME Enter username
PASSWORD Enter password
DOMAIN Enter domain

AUTHENTICATION METHODS

PAP	<input type="checkbox"/>
CHAP	<input type="checkbox"/>
MSCHAP	<input type="checkbox"/>
MSCHAPv2	<input checked="" type="checkbox"/>
EAP	<input type="checkbox"/>

TUNNEL OPTIONS

POINT-TO-POINT ENCRYPTION (MPPE) All Available ▾

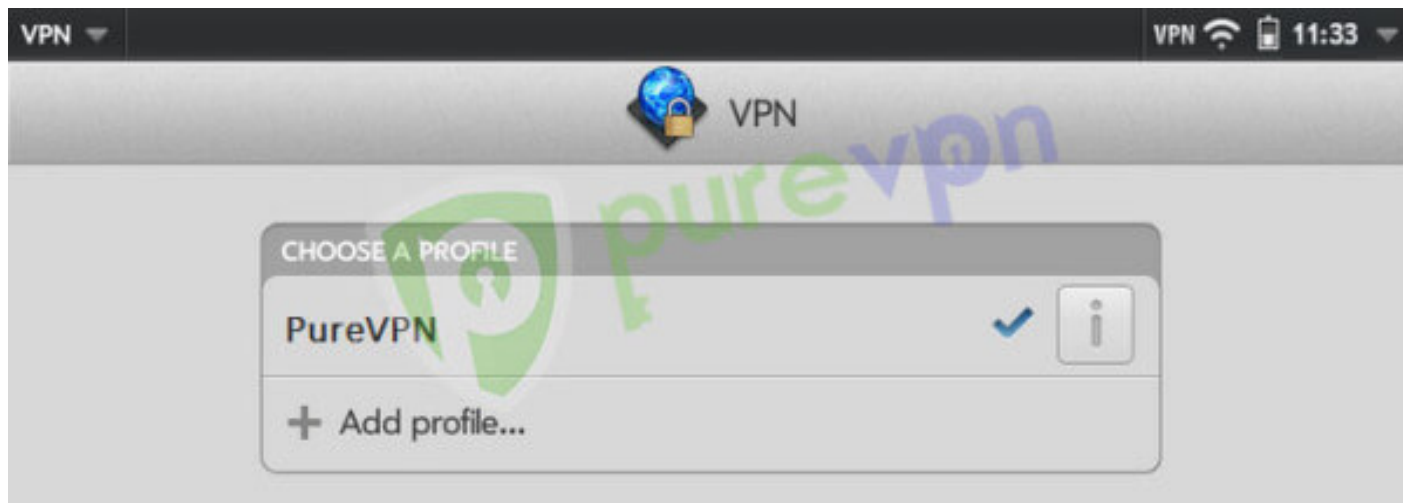

Allow Stateful Encryption

Tunnel All Traffic

DNS SEARCH DOMAINS Enter comma-separated domains

Back Connect

- The connection will be established in few seconds and a VPN icon will appear on the top bar next **WIFI Icon**
