

## How to Setup PureVPN on Kodi for Linux (Isengard)

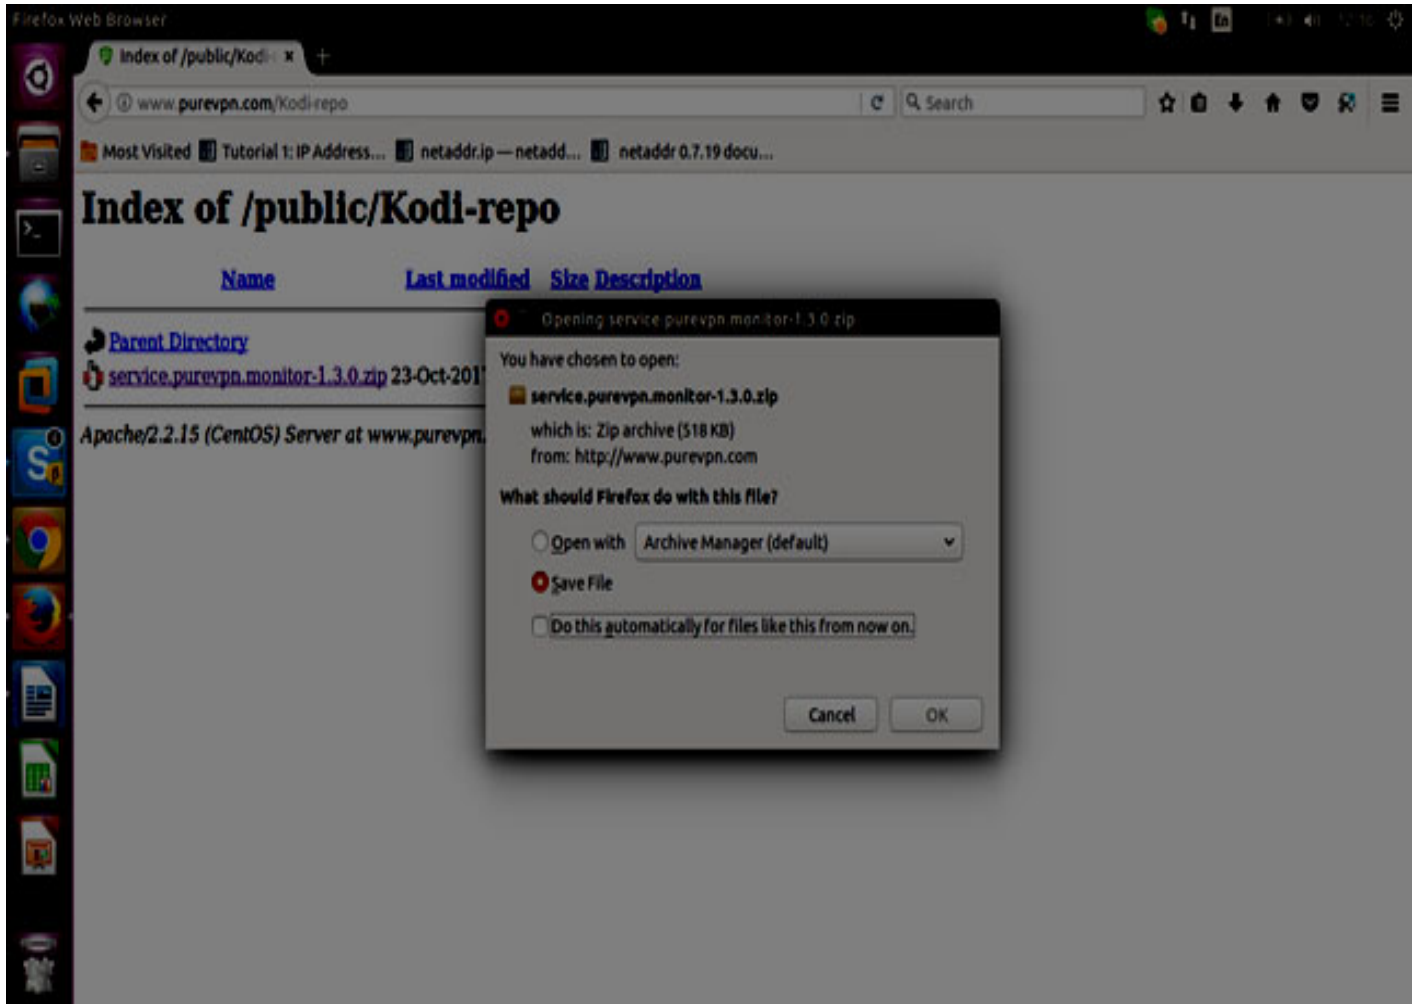

PureVPN can be easily configured on Linux Isengard. If you're facing any issue, kindly go through the article to rectify the problem.

- Download the **Installation File** for **PureVPN Kodi Add-on**

Open browser and go to [www.purevpn.com/Kodi-repo](http://www.purevpn.com/Kodi-repo)

- Click [service.purevpn.monitor-1.3.0.zip](#). A download pop up will appear. Check on **Save File** and click **OK** to download the installation file.

- Locate the downloaded installation file.

---

- Install OpenVPN, KODI and other dependencies (Ignore if already Installed)

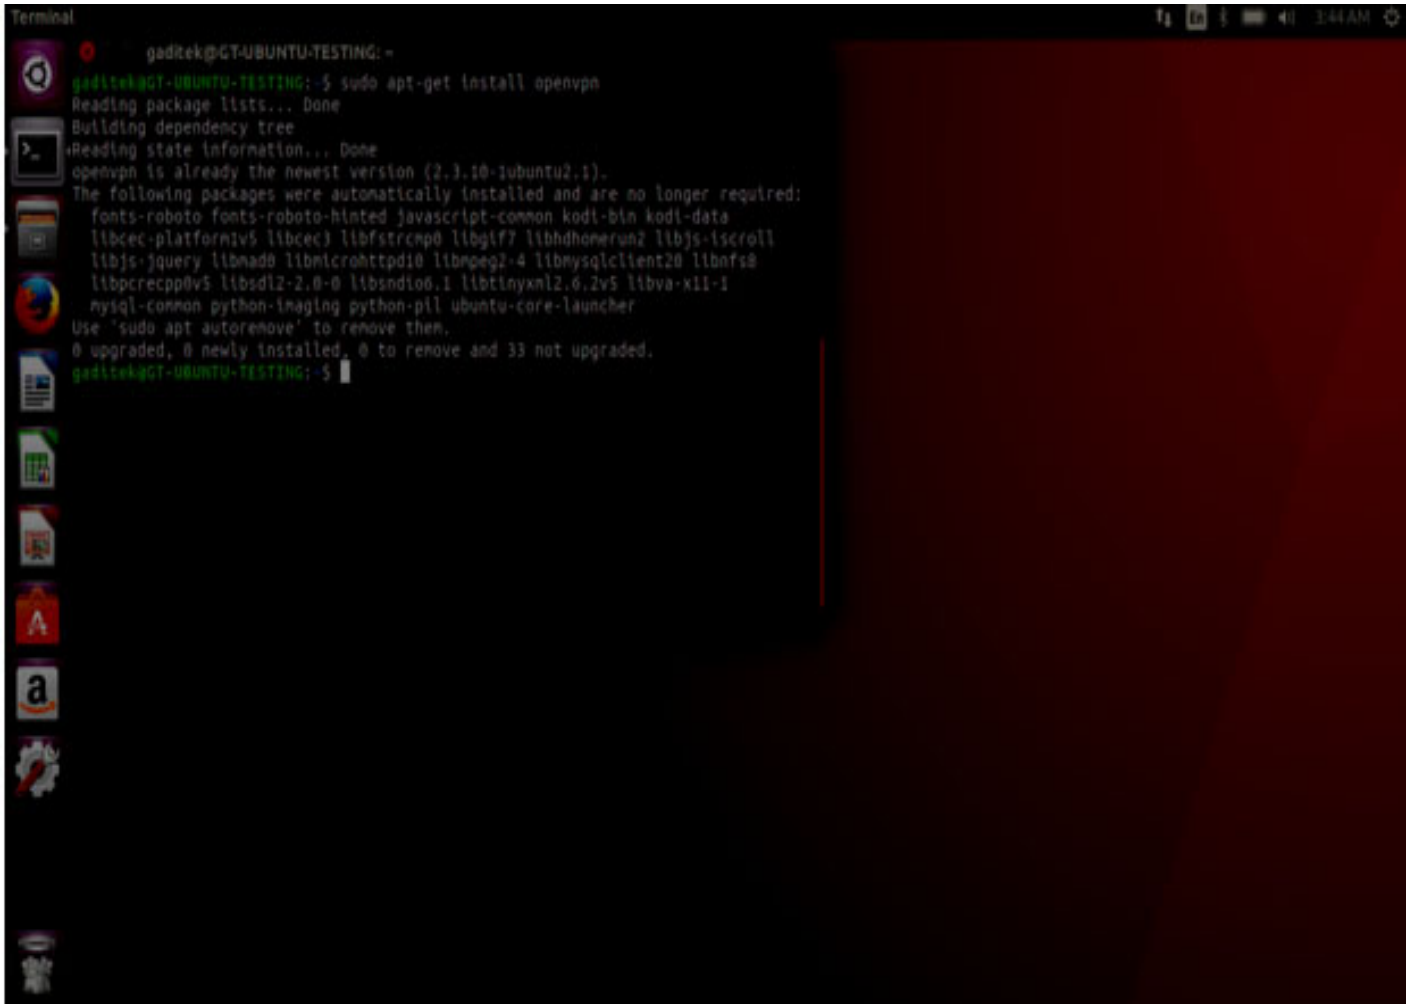

Open **Terminal** and type these **Commands**:

- `sudo apt-get update` (to update)

```
Terminal
gaditek@GT-UBUNTU-TESTING: ~
gaditek@GT-UBUNTU-TESTING:~$ sudo apt-get update
Get:1 http://security.ubuntu.com/ubuntu xenial-security InRelease [102 kB]
Hit:2 http://ppa.launchpad.net/maarten-baert/simplescreenrecorder/ubuntu xenial
InRelease
Get:3 http://security.ubuntu.com/ubuntu xenial-security/main amd64 Packages [370
kB]
Hit:4 http://us.archive.ubuntu.com/ubuntu xenial InRelease
Get:5 http://us.archive.ubuntu.com/ubuntu xenial-updates InRelease [102 kB]
Get:6 http://security.ubuntu.com/ubuntu xenial-security/main i386 Packages [344
kB]
0% [5 InRelease 27.2 kB/102 kB 27%] [6 Packages 86.7 kB/344 kB 25%]
```

- `sudo apt-get install openvpn` (to install openvpn)

```
Terminal
gaditek@CT-UBUNTU-TESTING: ~
gaditek@CT-UBUNTU-TESTING:~$ sudo apt-get install openvpn

```

- Launch **KODI** and install PureVPN Addon for KODI
- Open **Terminal** and type `sudo kodi` to launch **KODI**

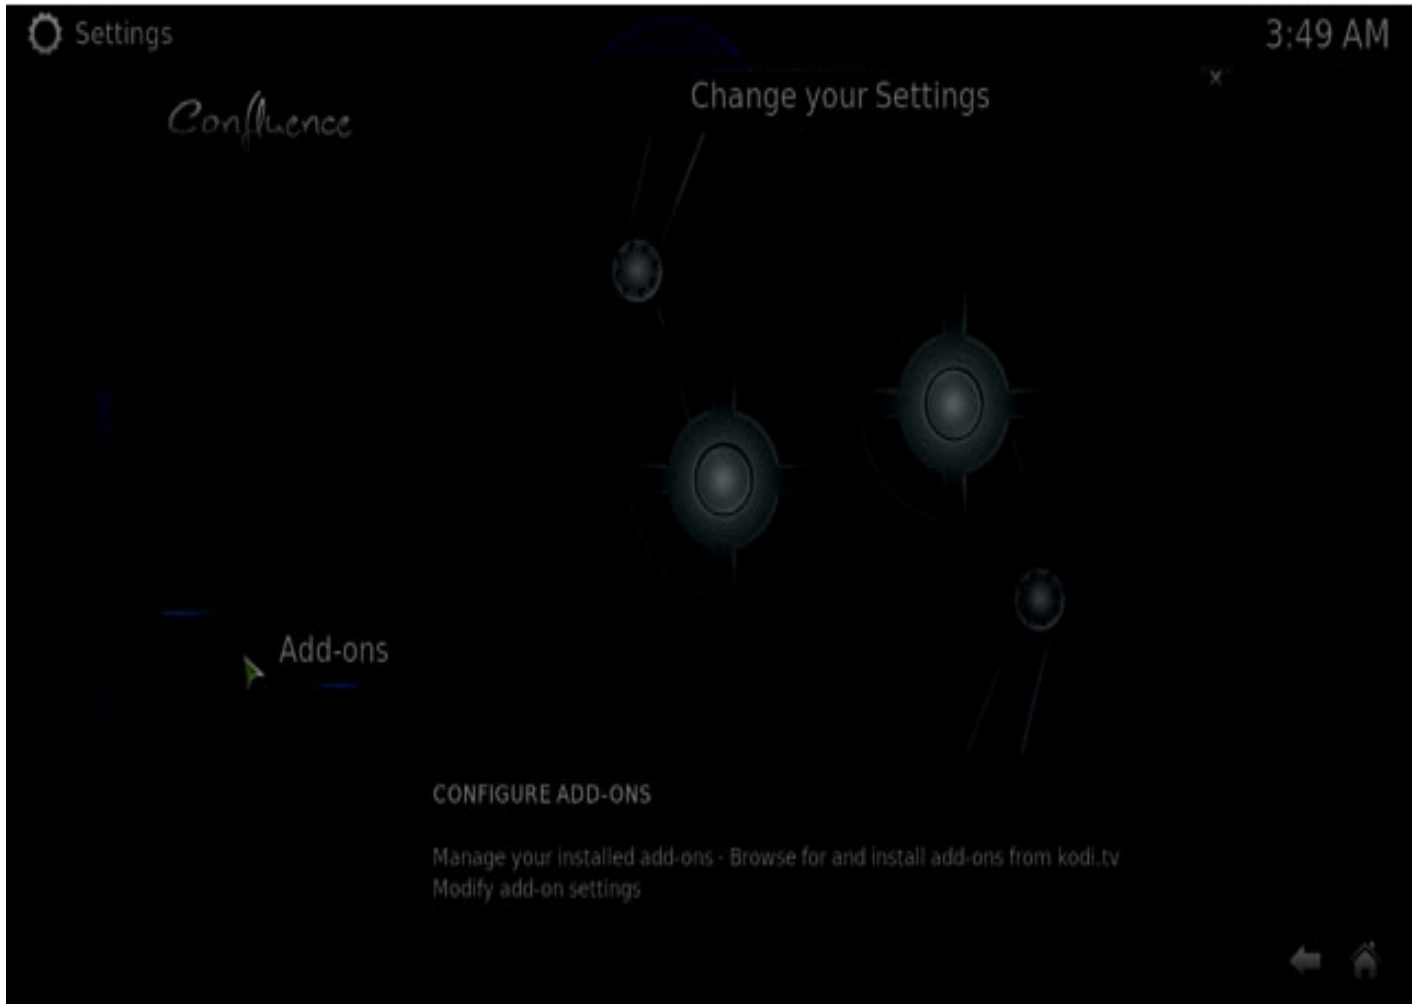

- Click **SYSTEM**.

- Click **Add-ons**.

- Click **Install from zip file.**

- Navigate to folder where installation file is downloaded.

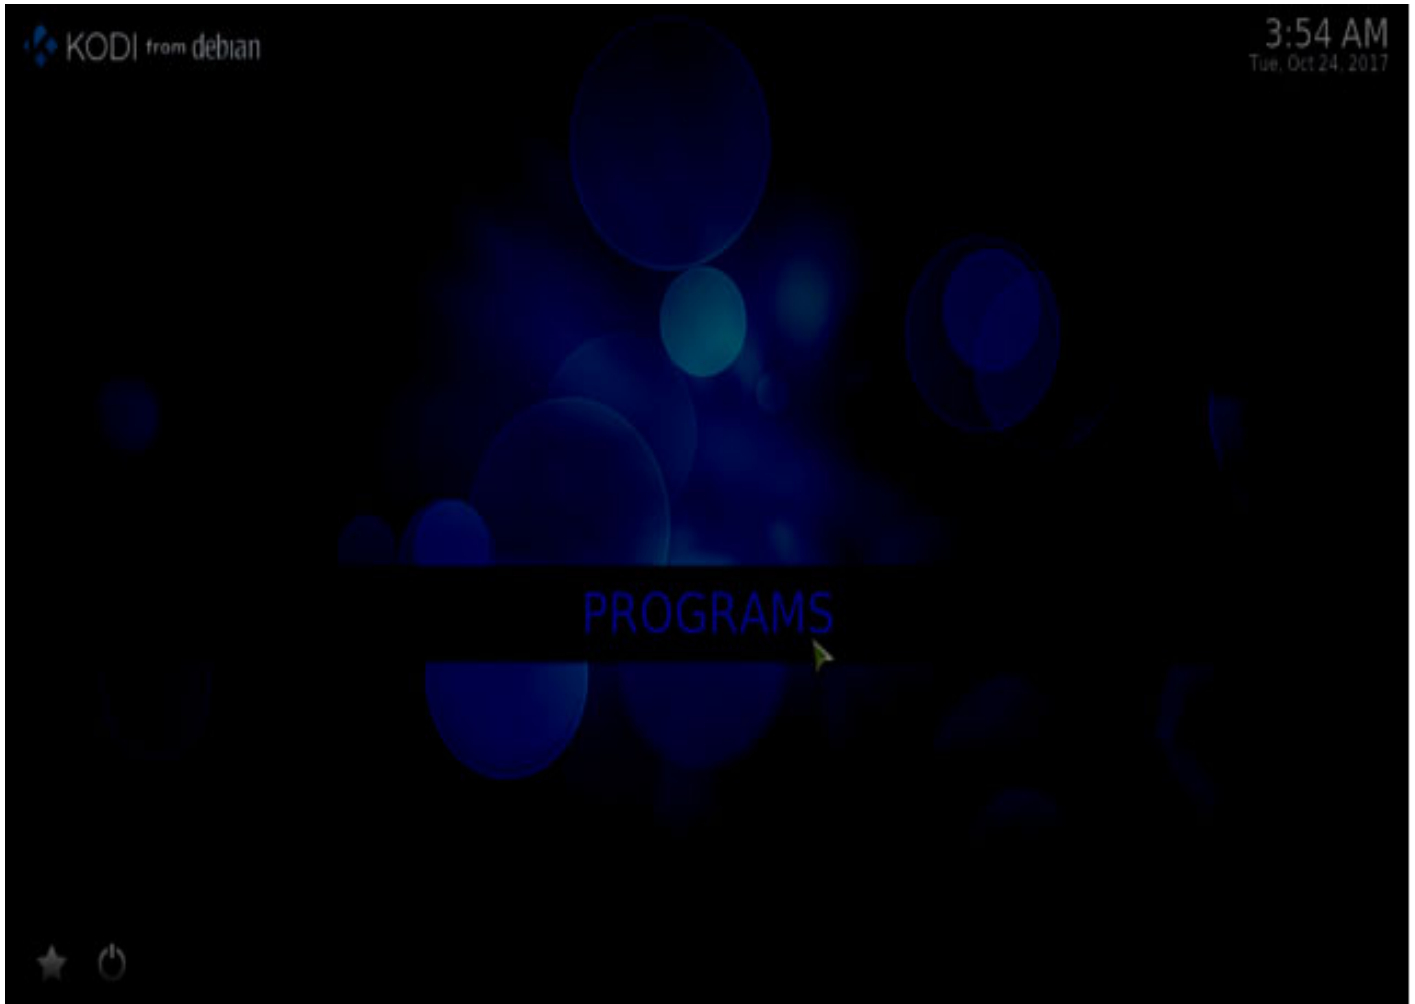

- Just click once **Service.purevpn.monitor-1.3.0.zip** and your add-on will be installed.

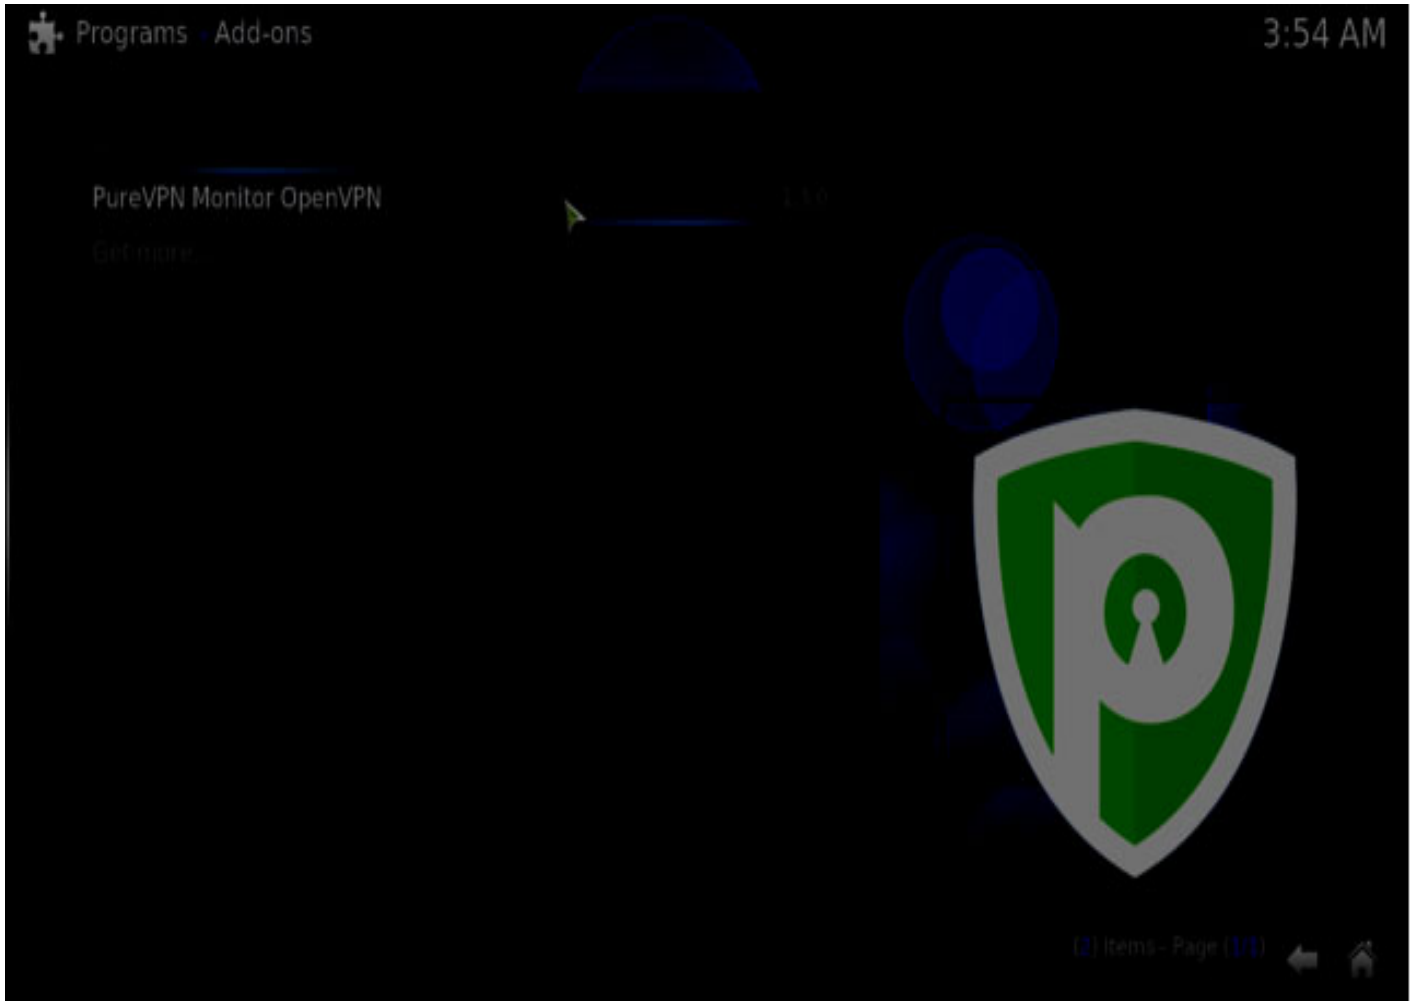

- Configuring and Setting up Installed PureVPN Add-on.
- Go to Home Page and click **PROGRAMS** tab.

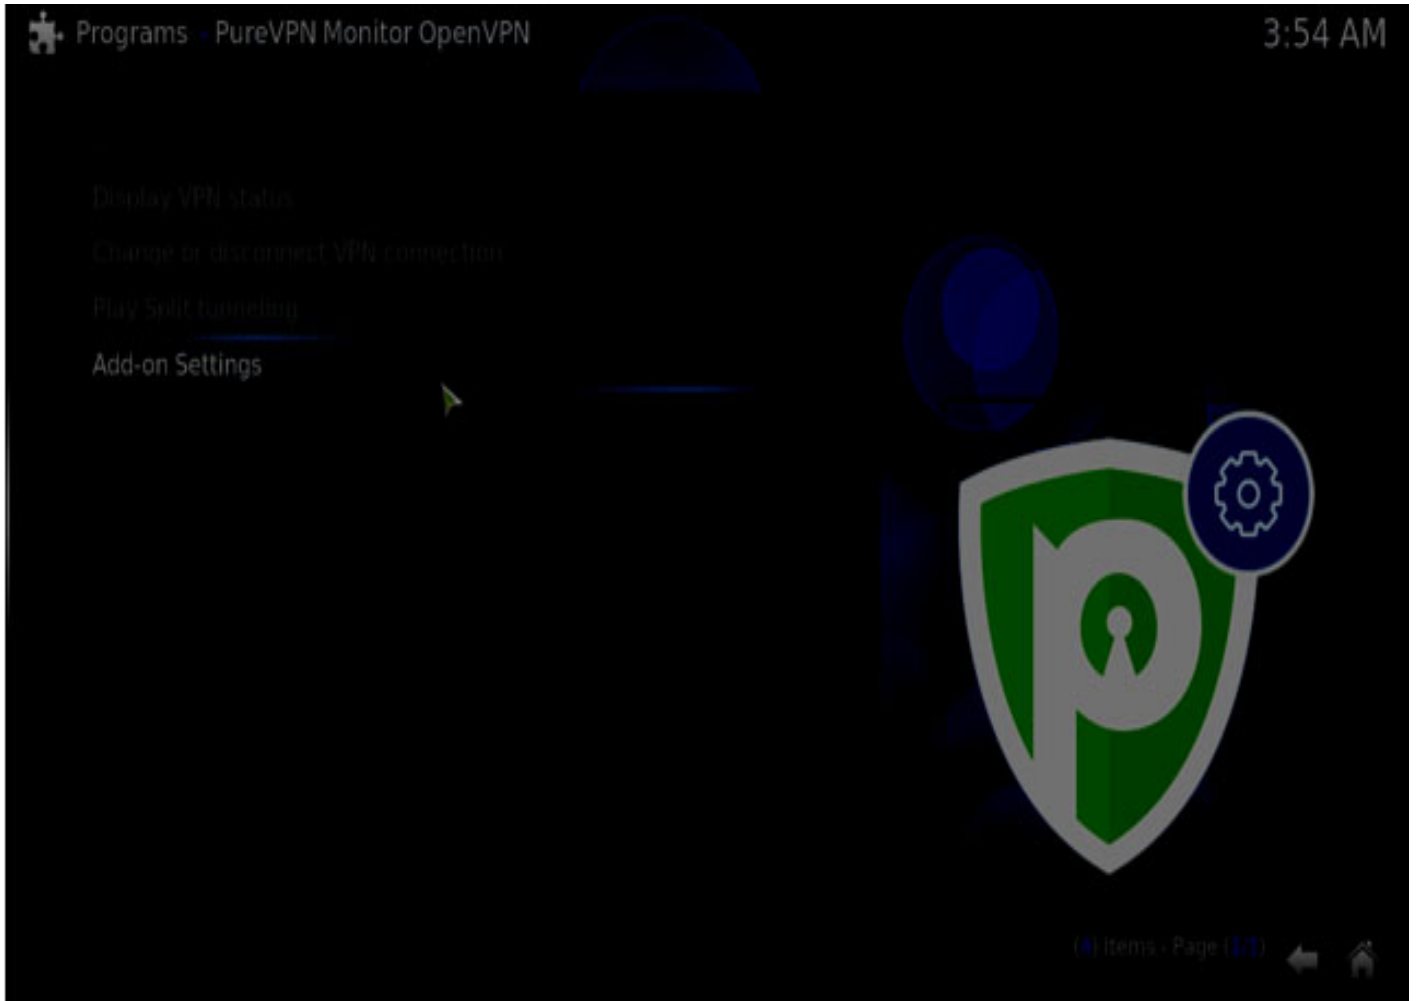

- Now, click **PureVPN Monitor OpenVPN**.

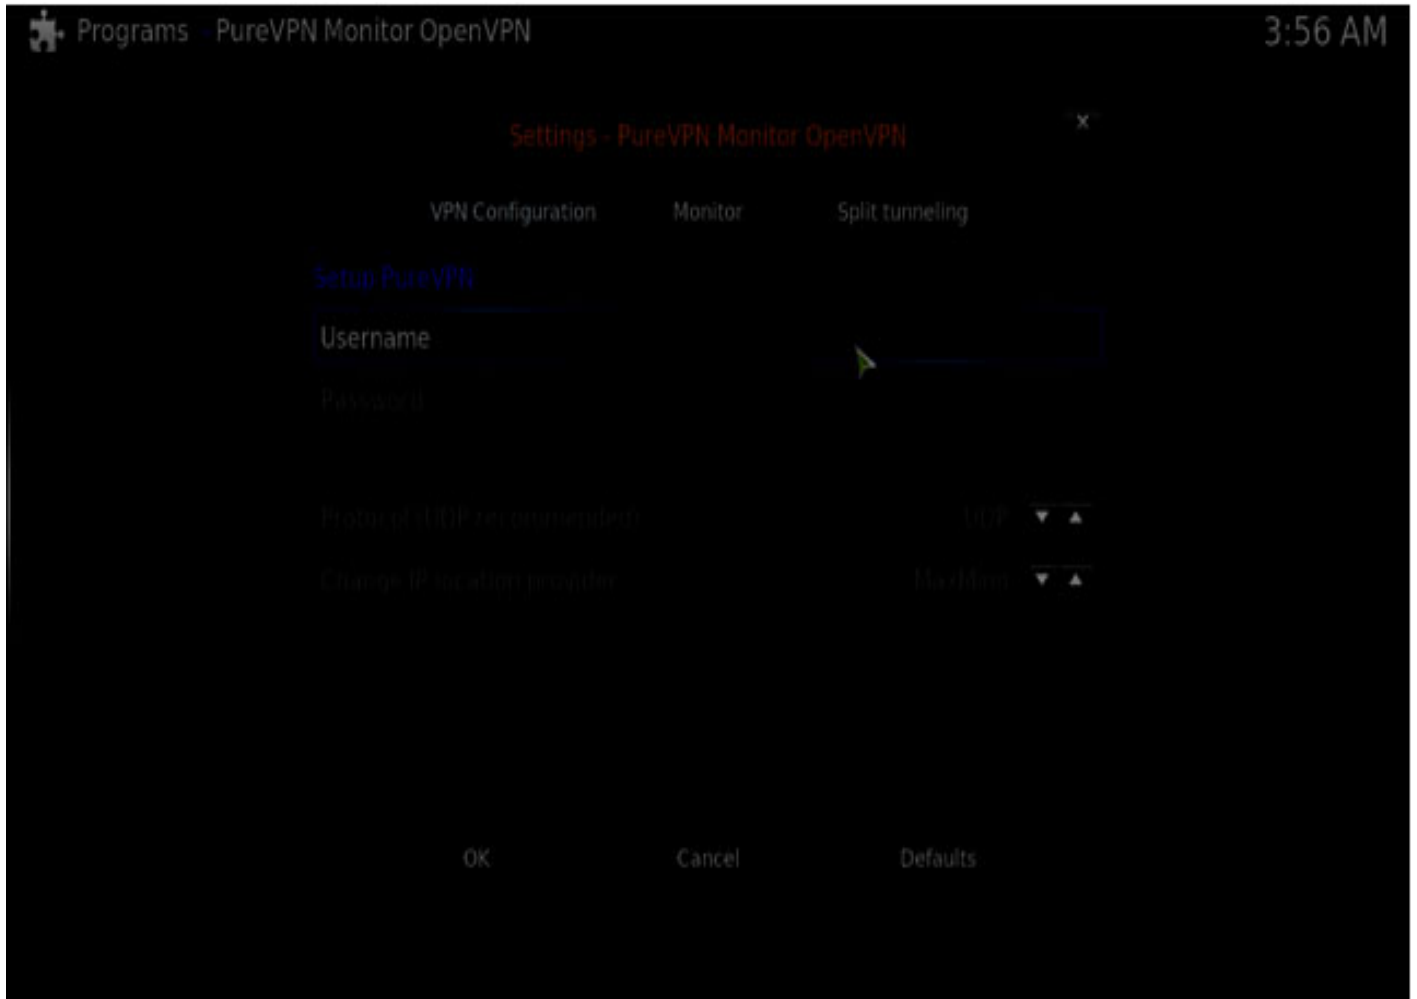

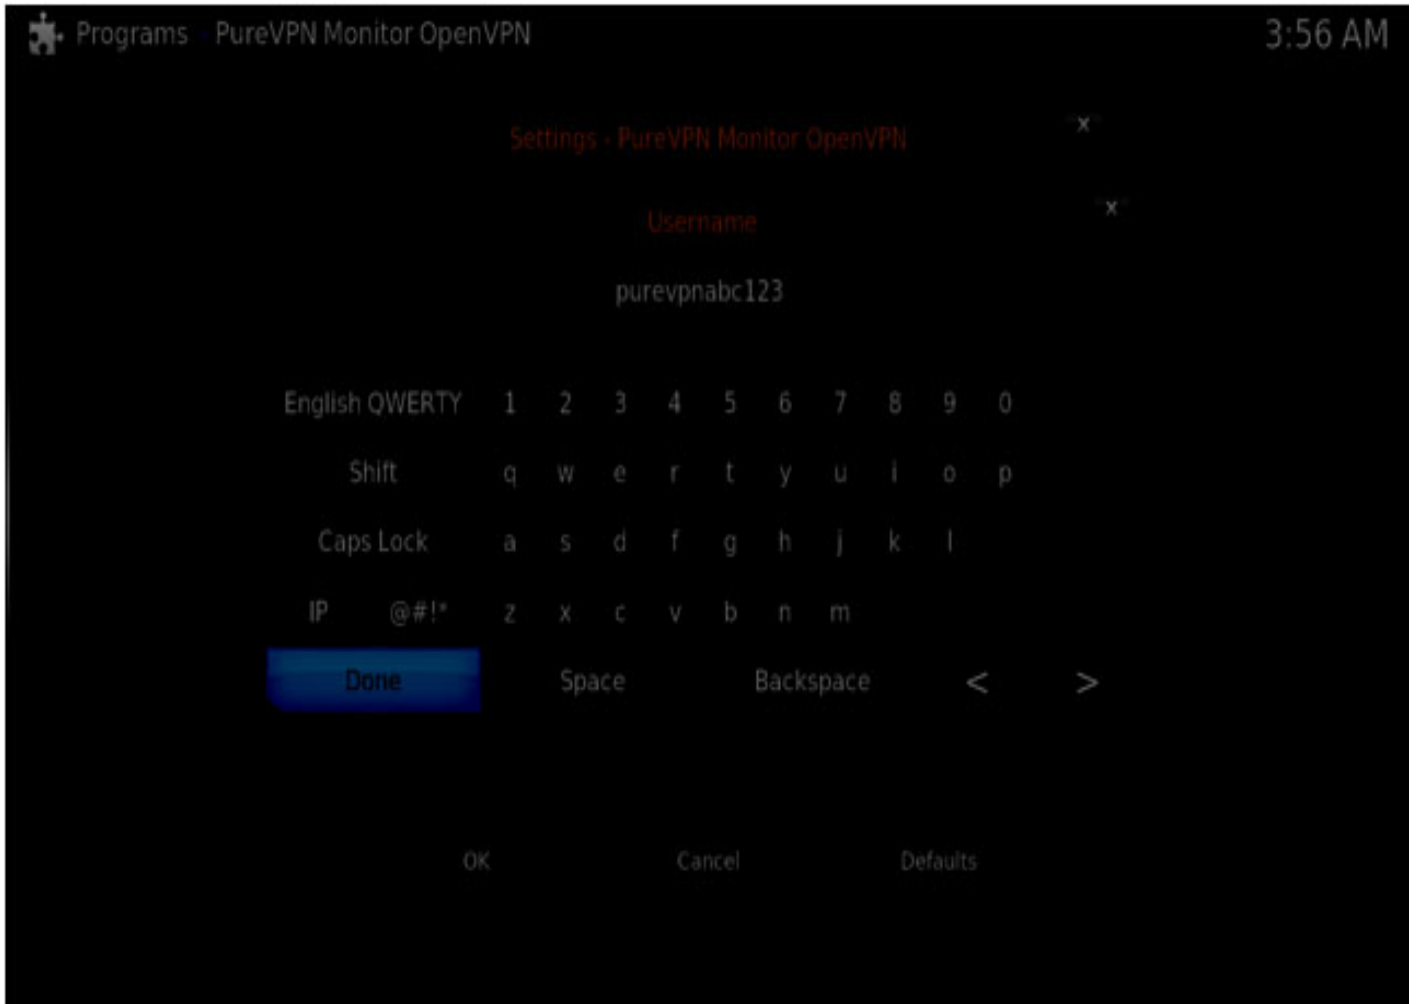

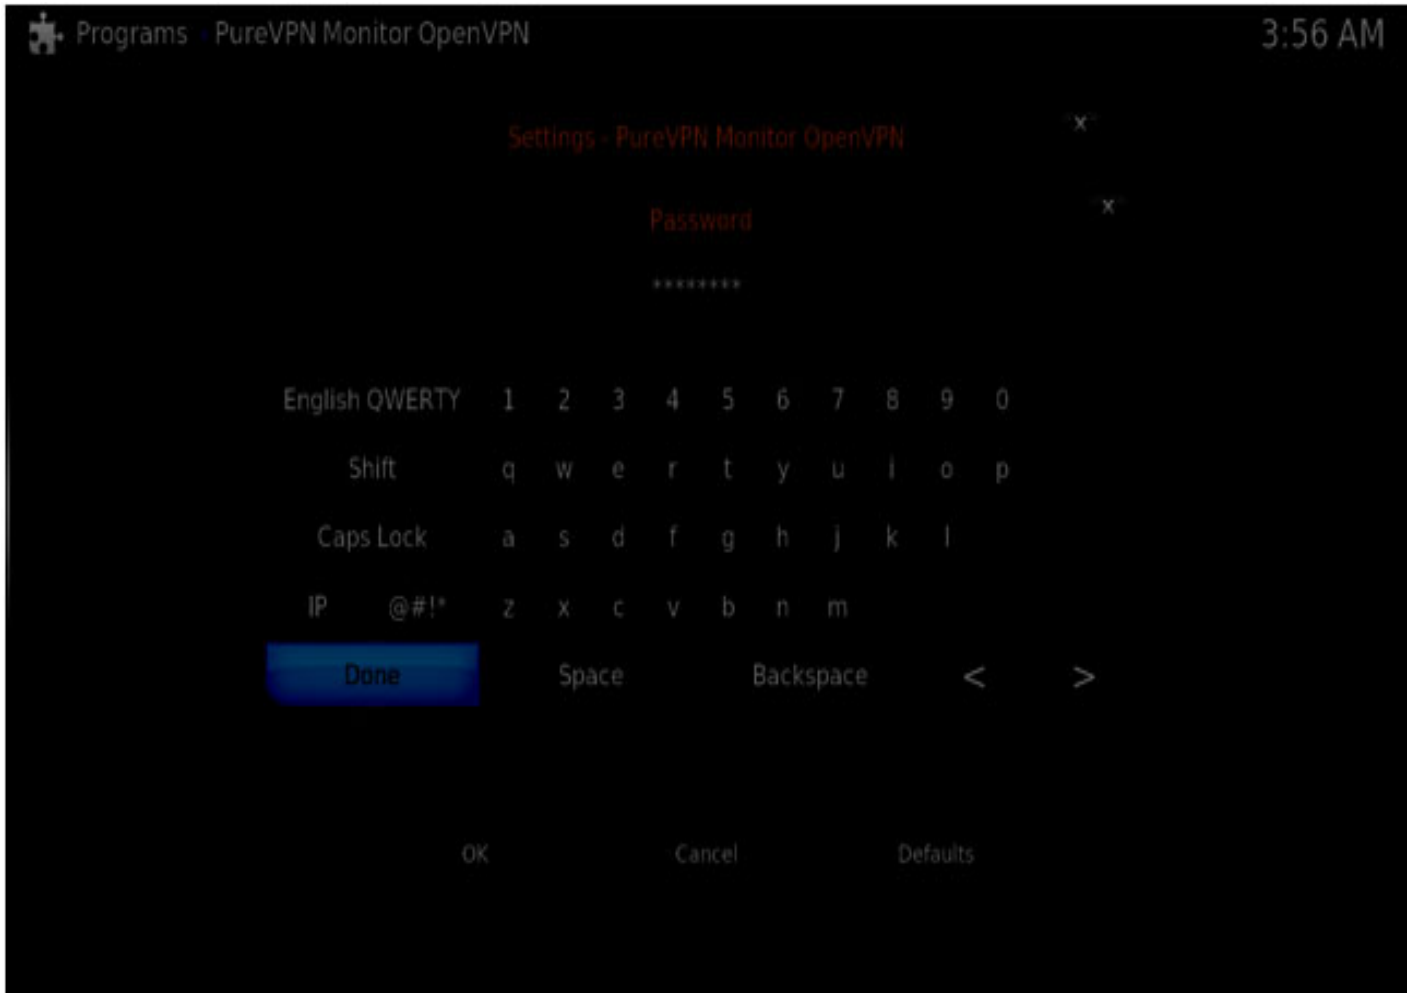

- Click **Add-on Settings**.

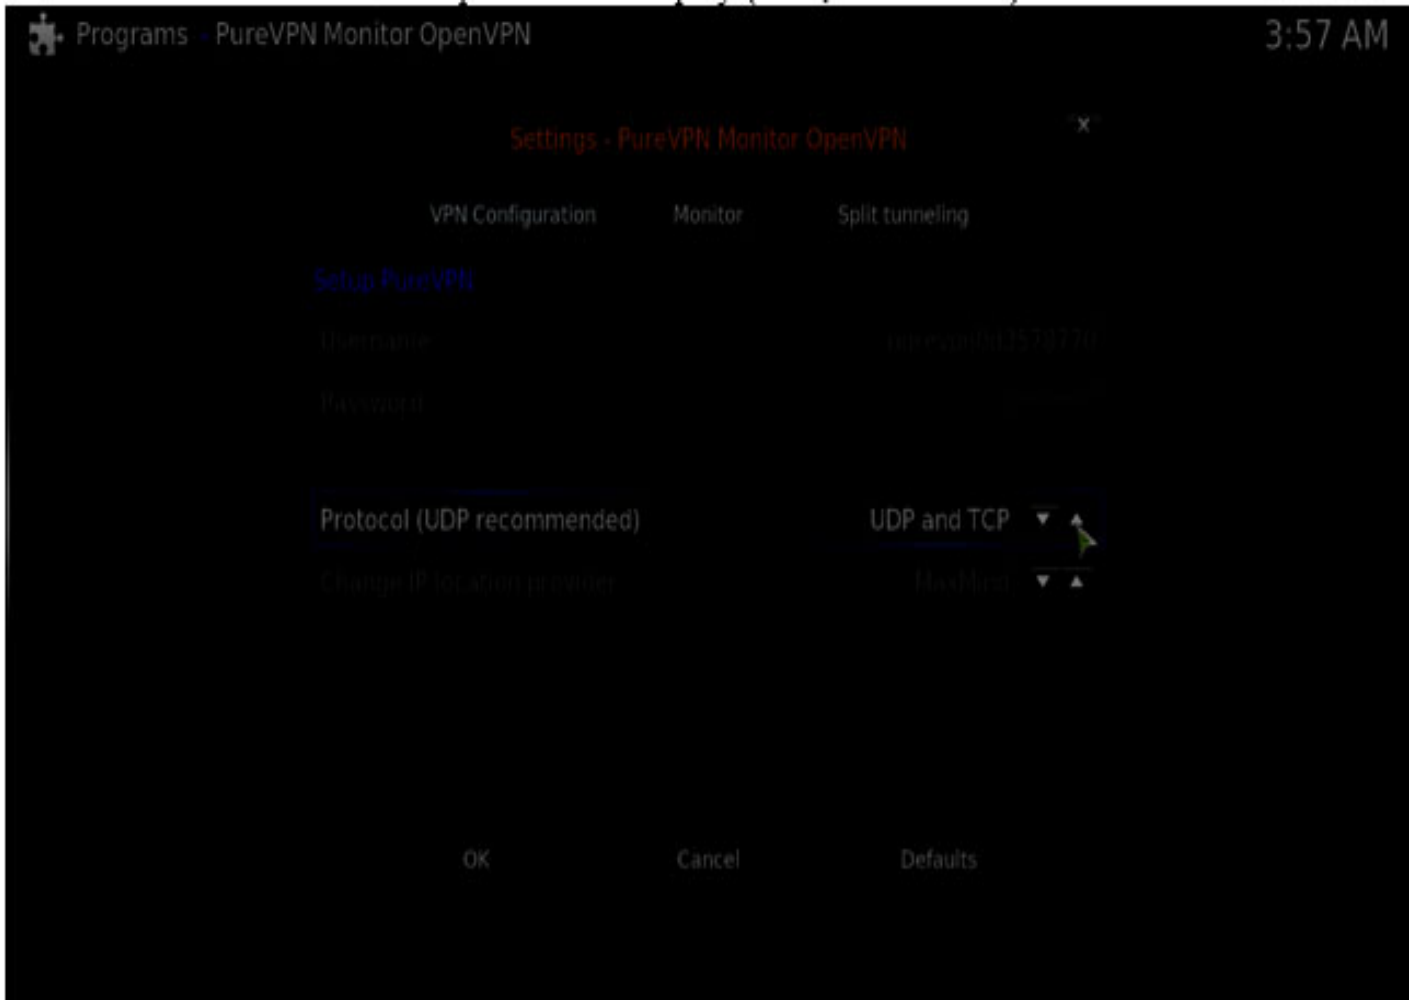

- In the VPN Configuration tab Enter your PureVPN credentials. Here is how you can [find your VPN credentials](#).

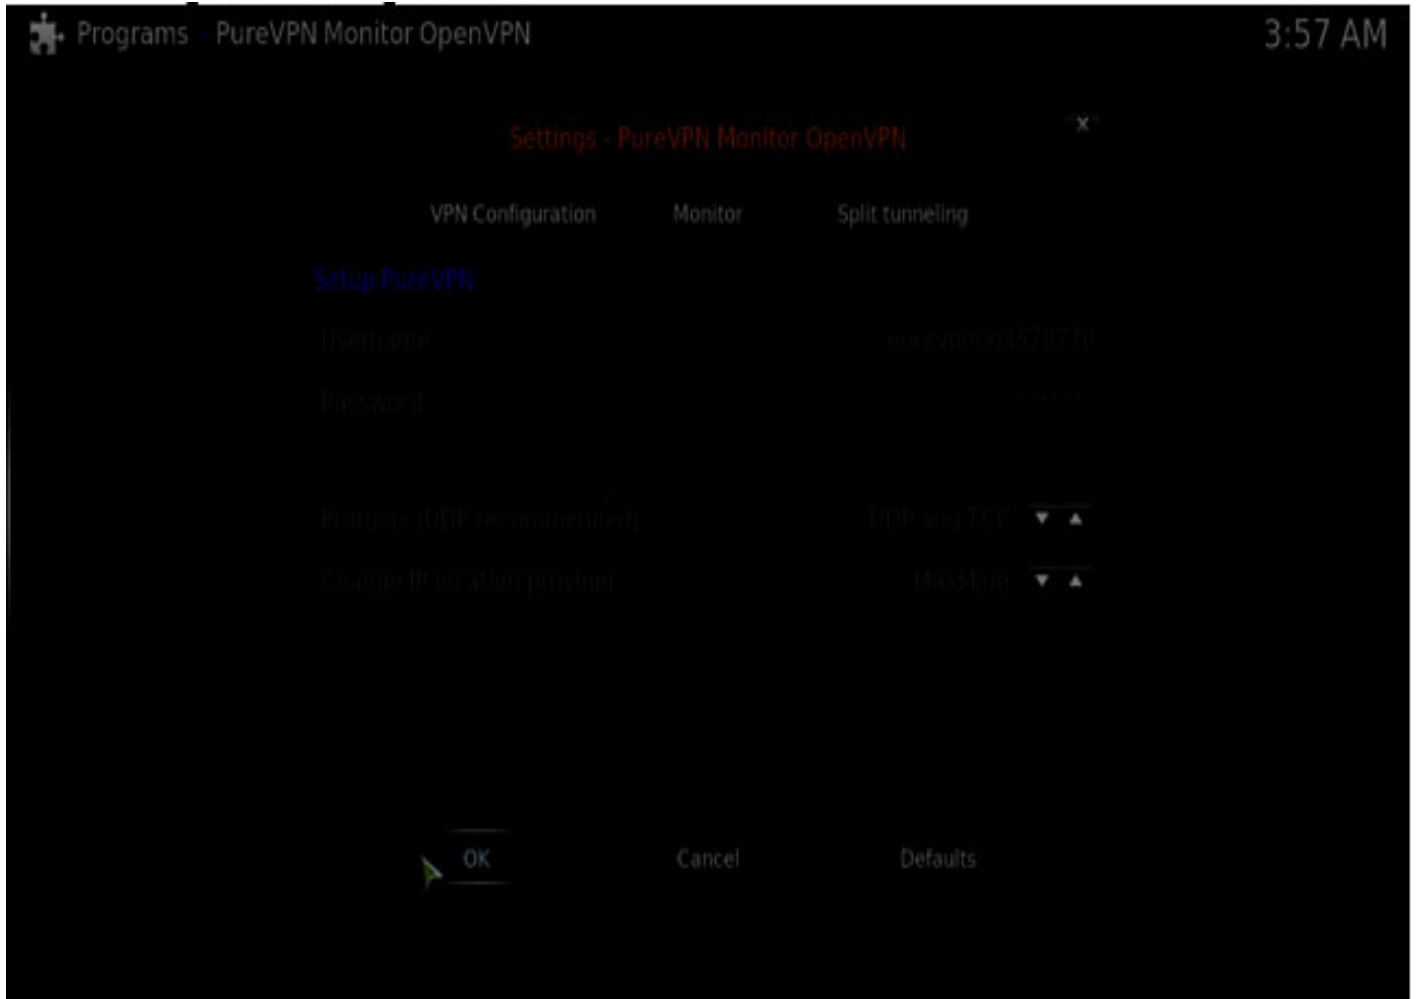

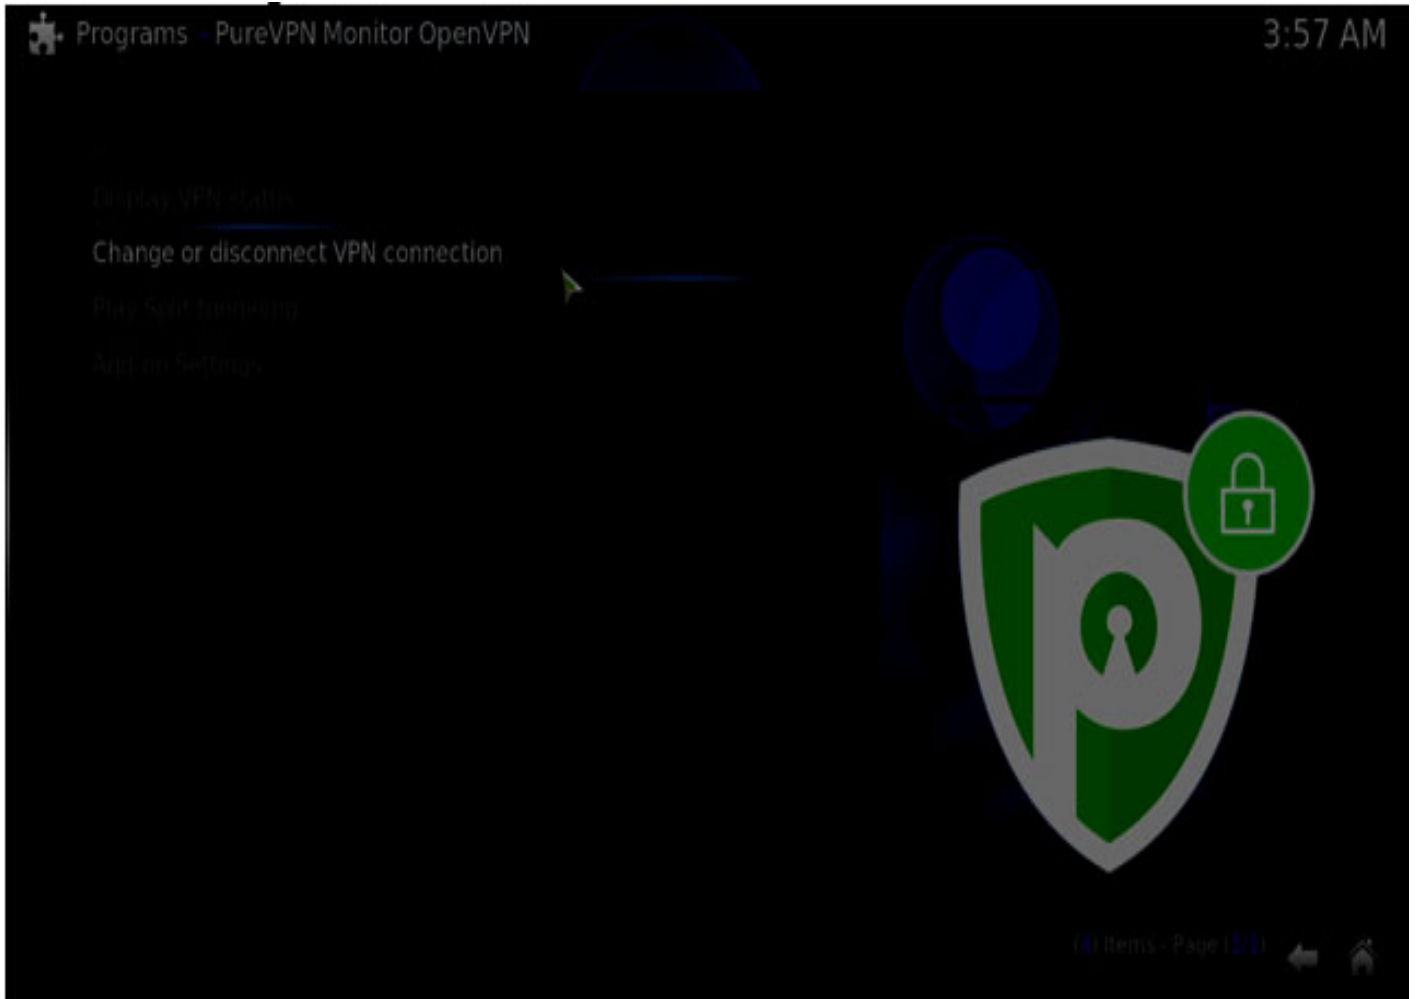

- You can also choose between protocols to display (UDP, TCP or both)

- After doing all the settings click **OK**.

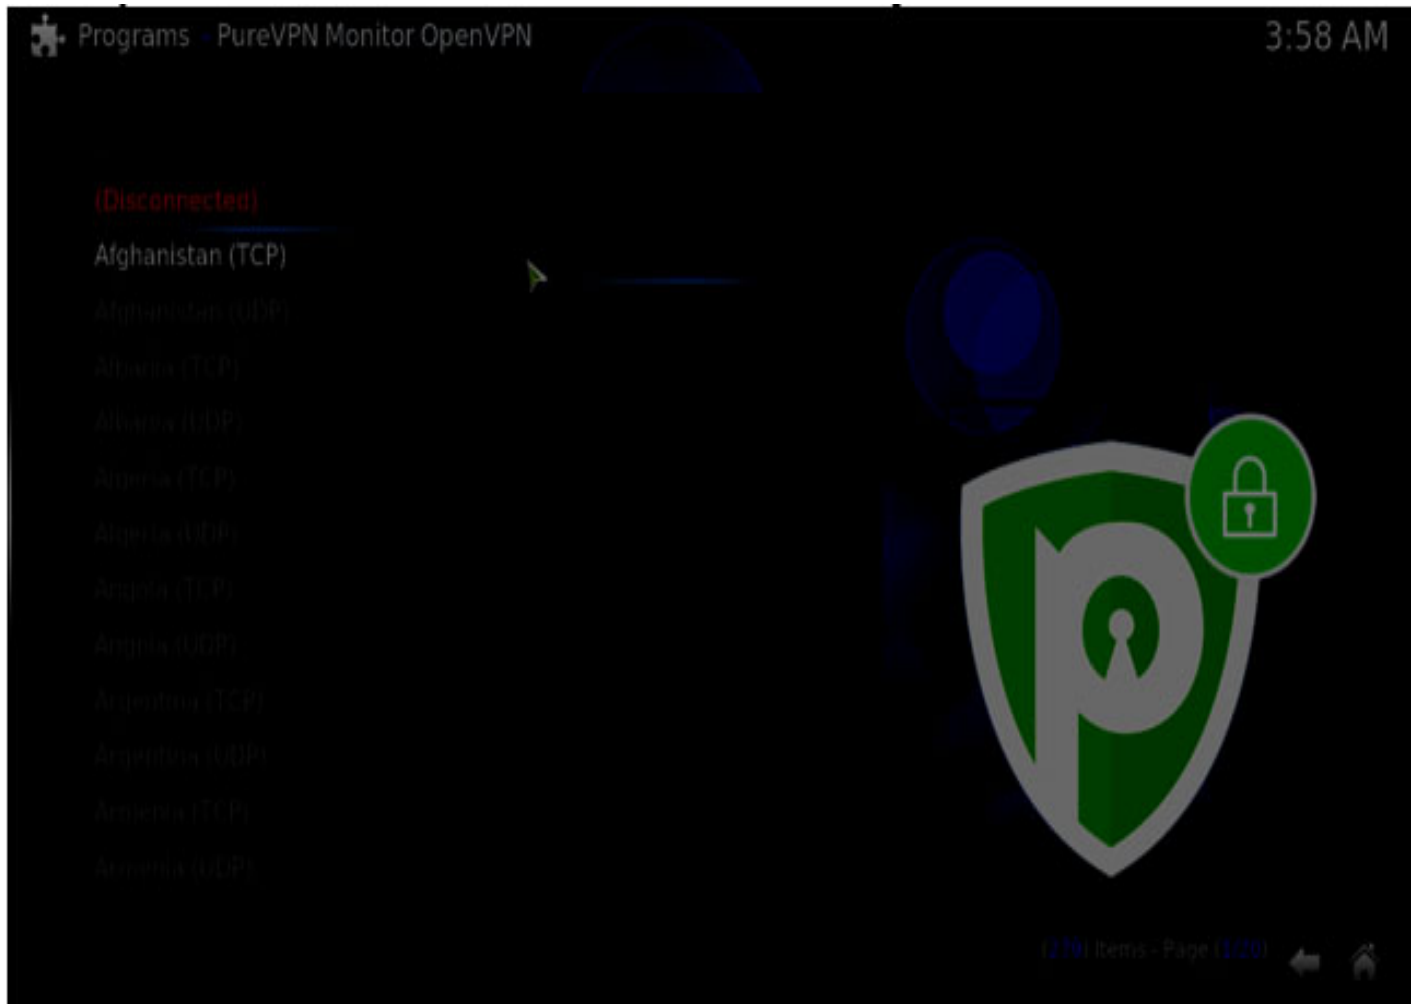

- Explore the Add-on
- Click **Change or disconnect VPN Connection.**

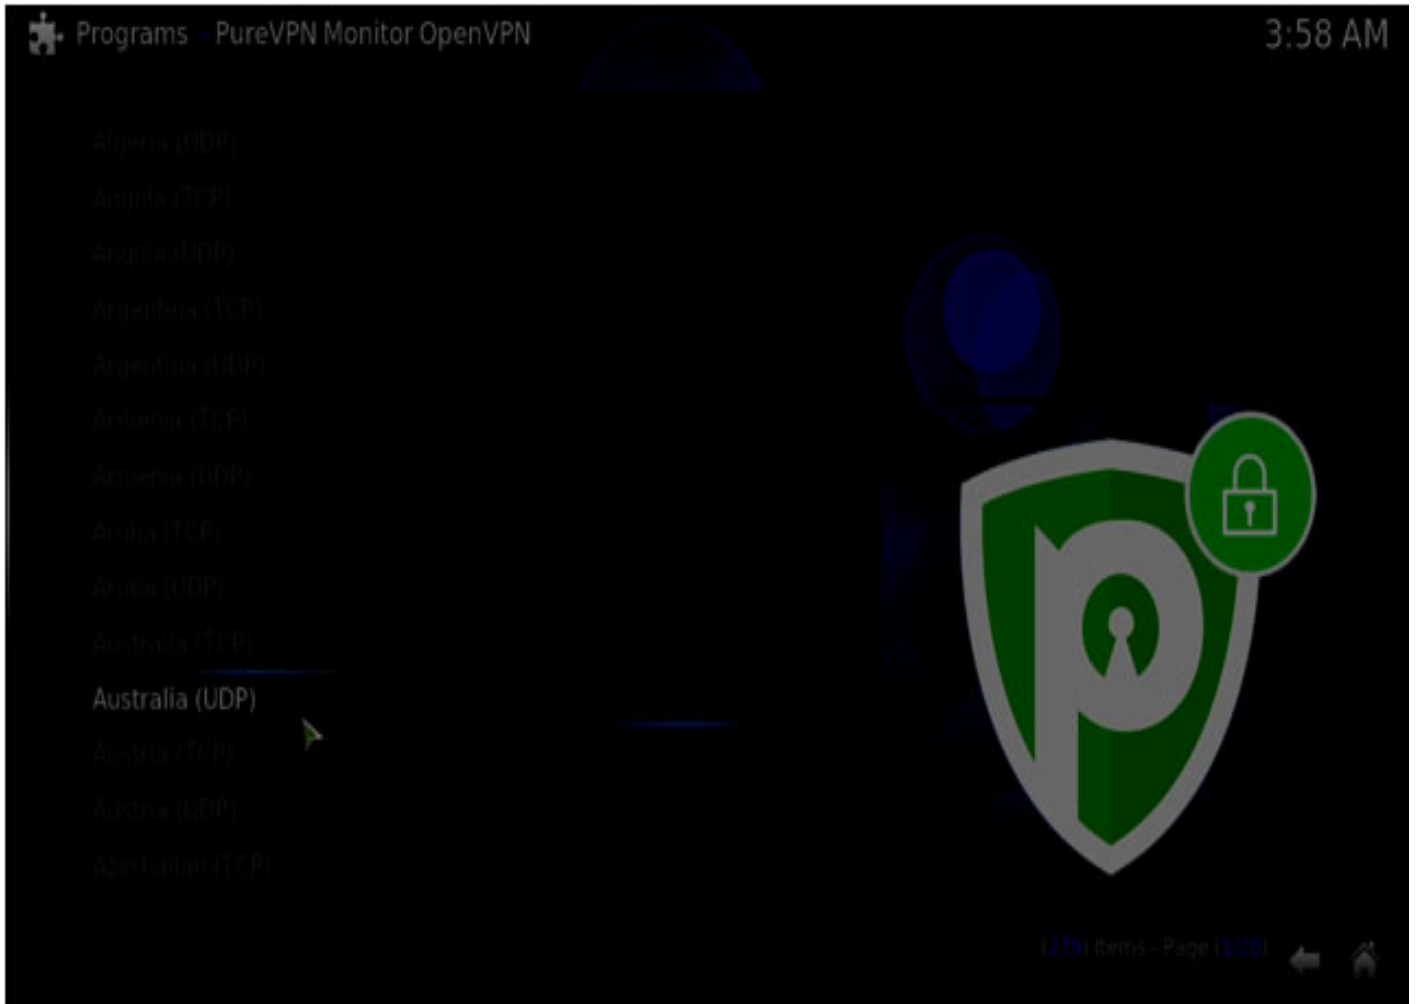

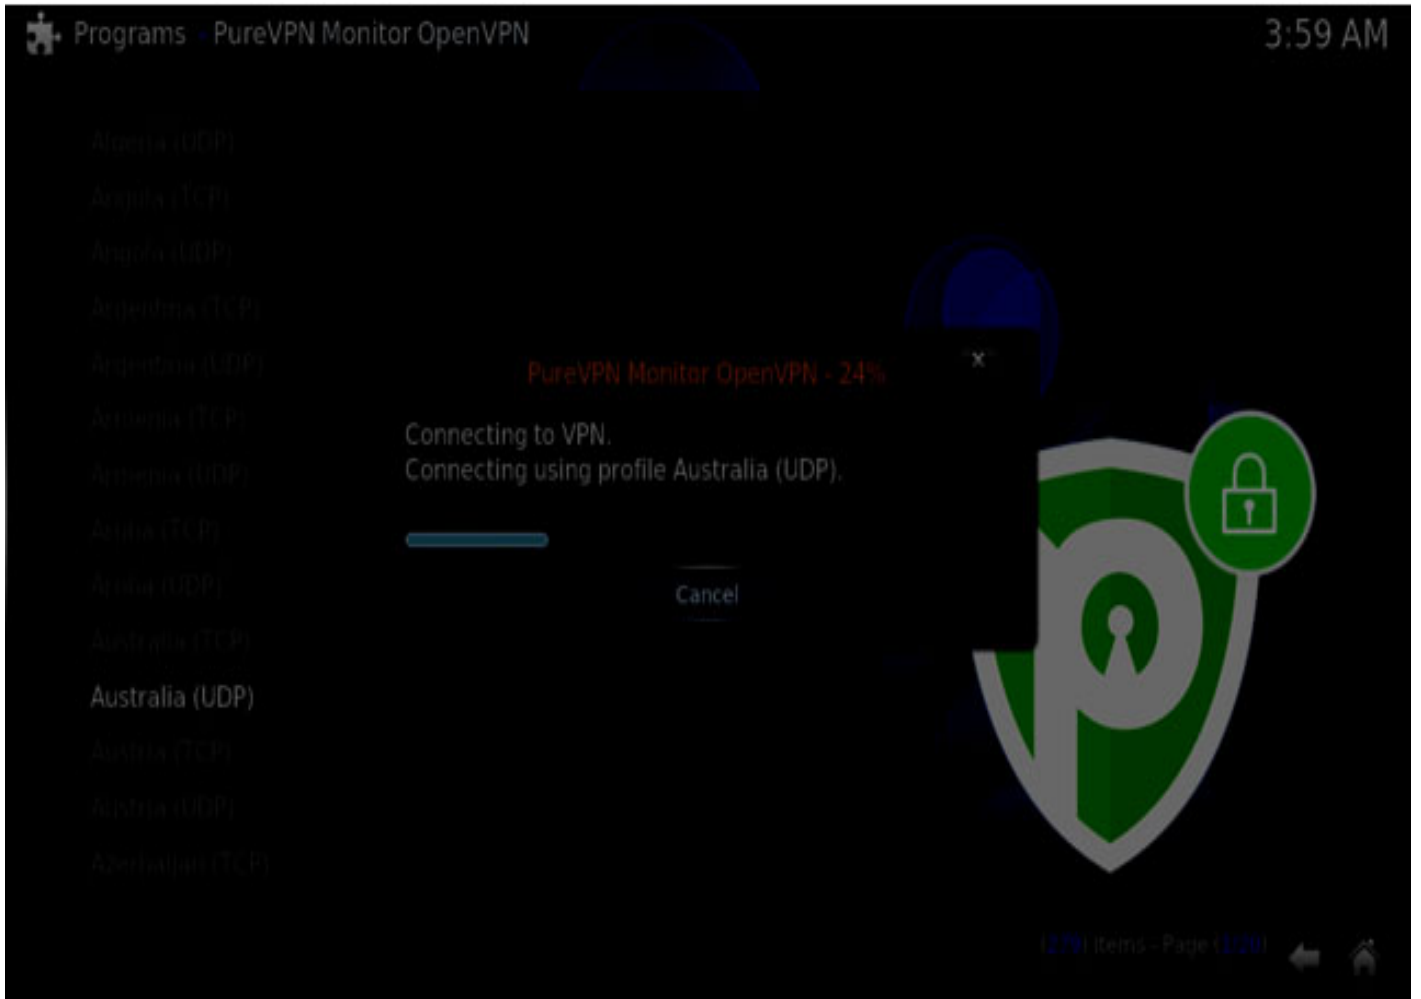

- Now you can choose from the list of available countries and protocols.

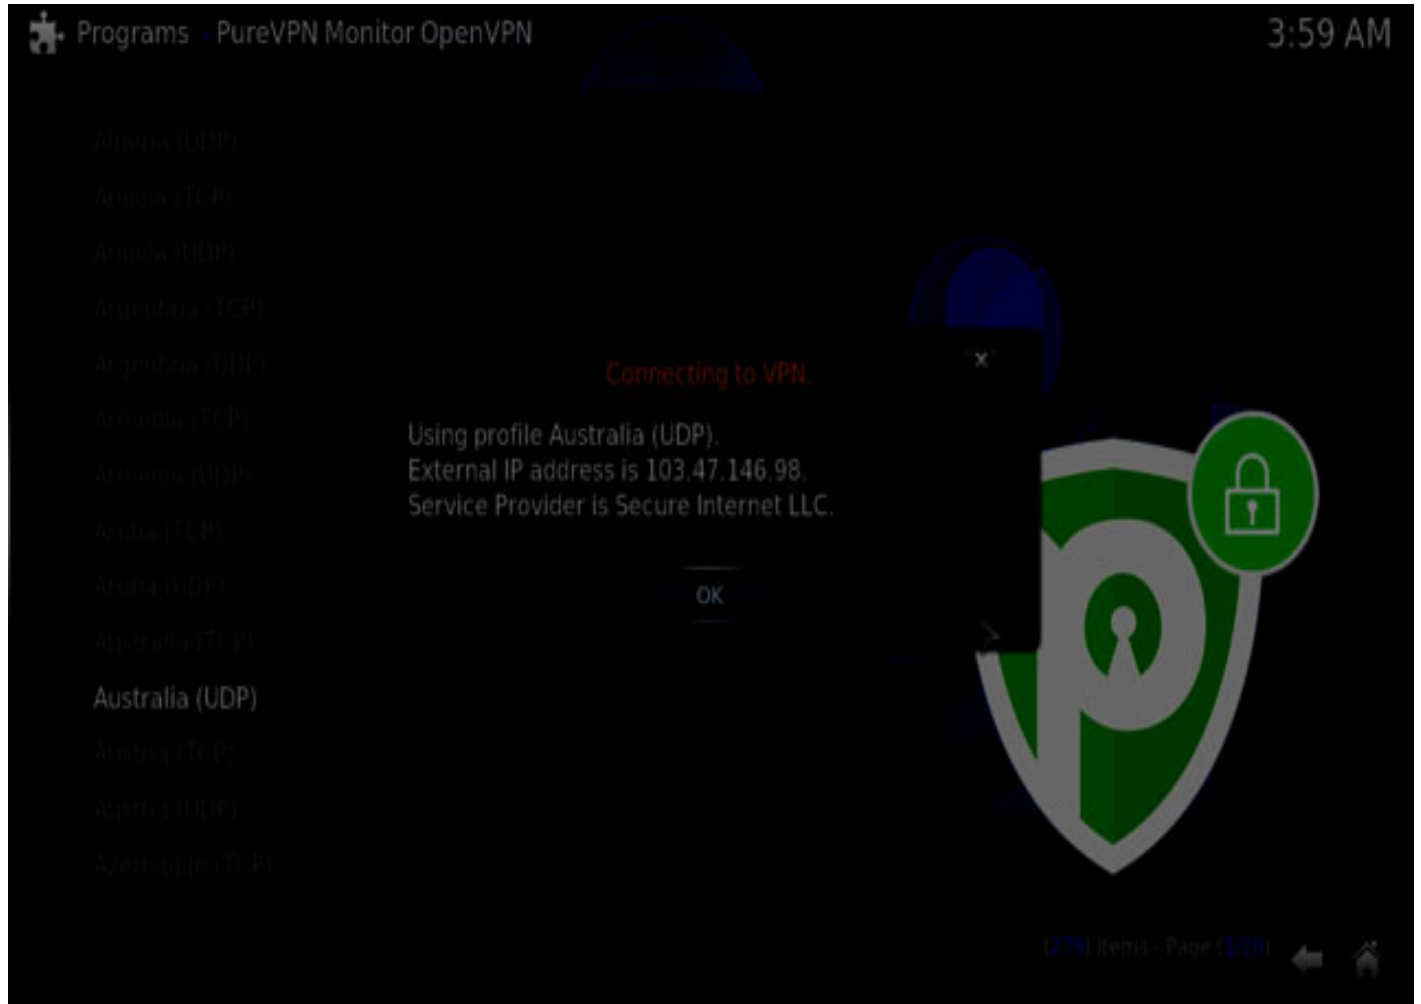

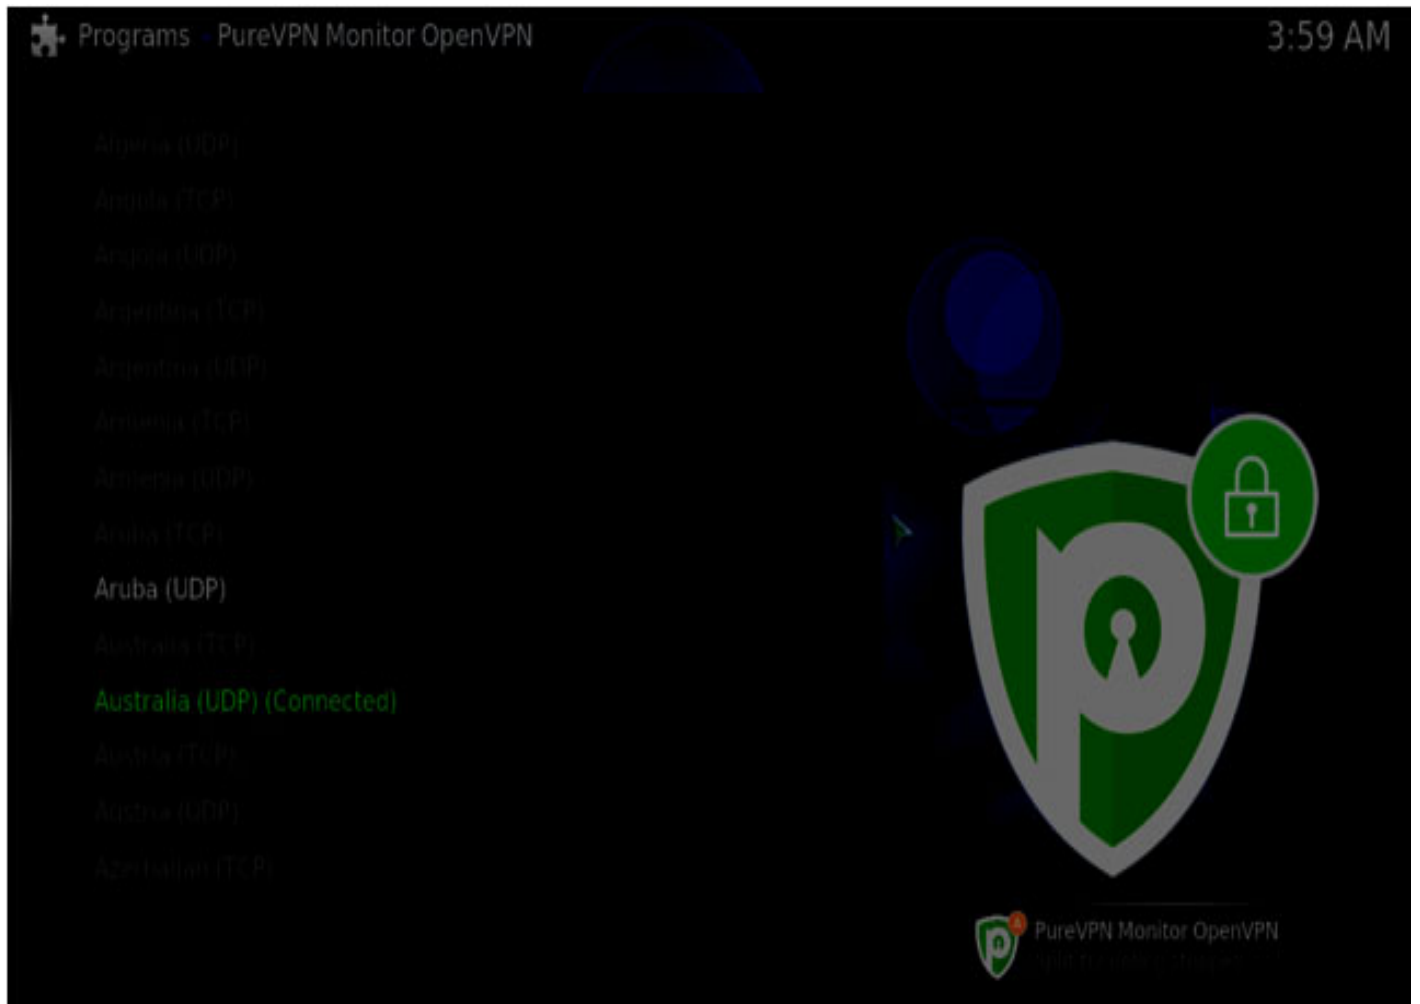

- Just click once desired location and protocol, and wait for the connection to establish.

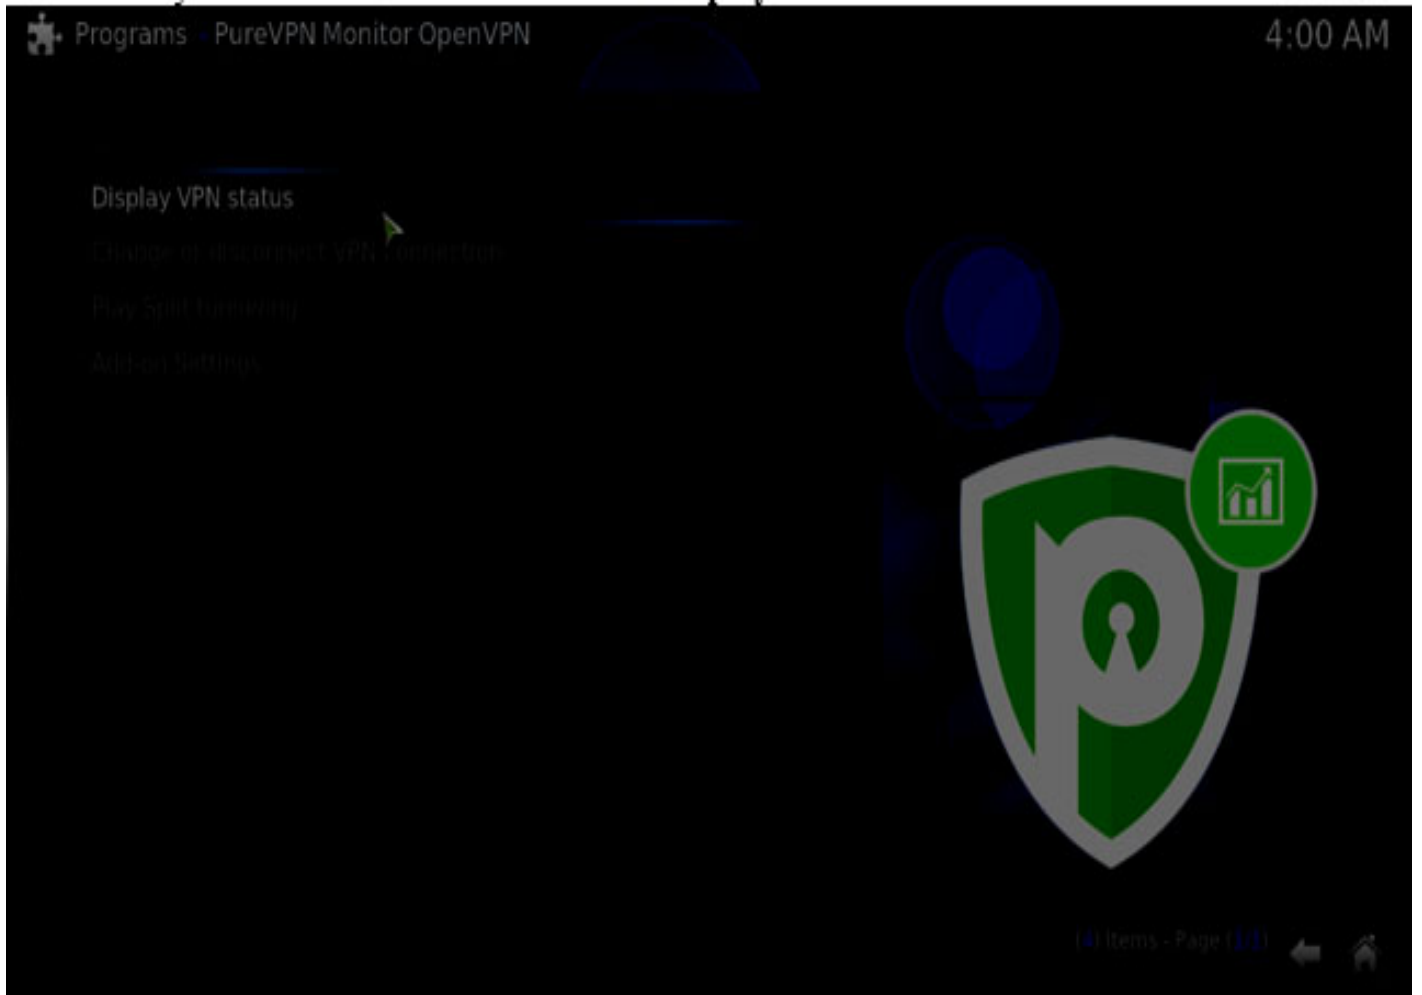

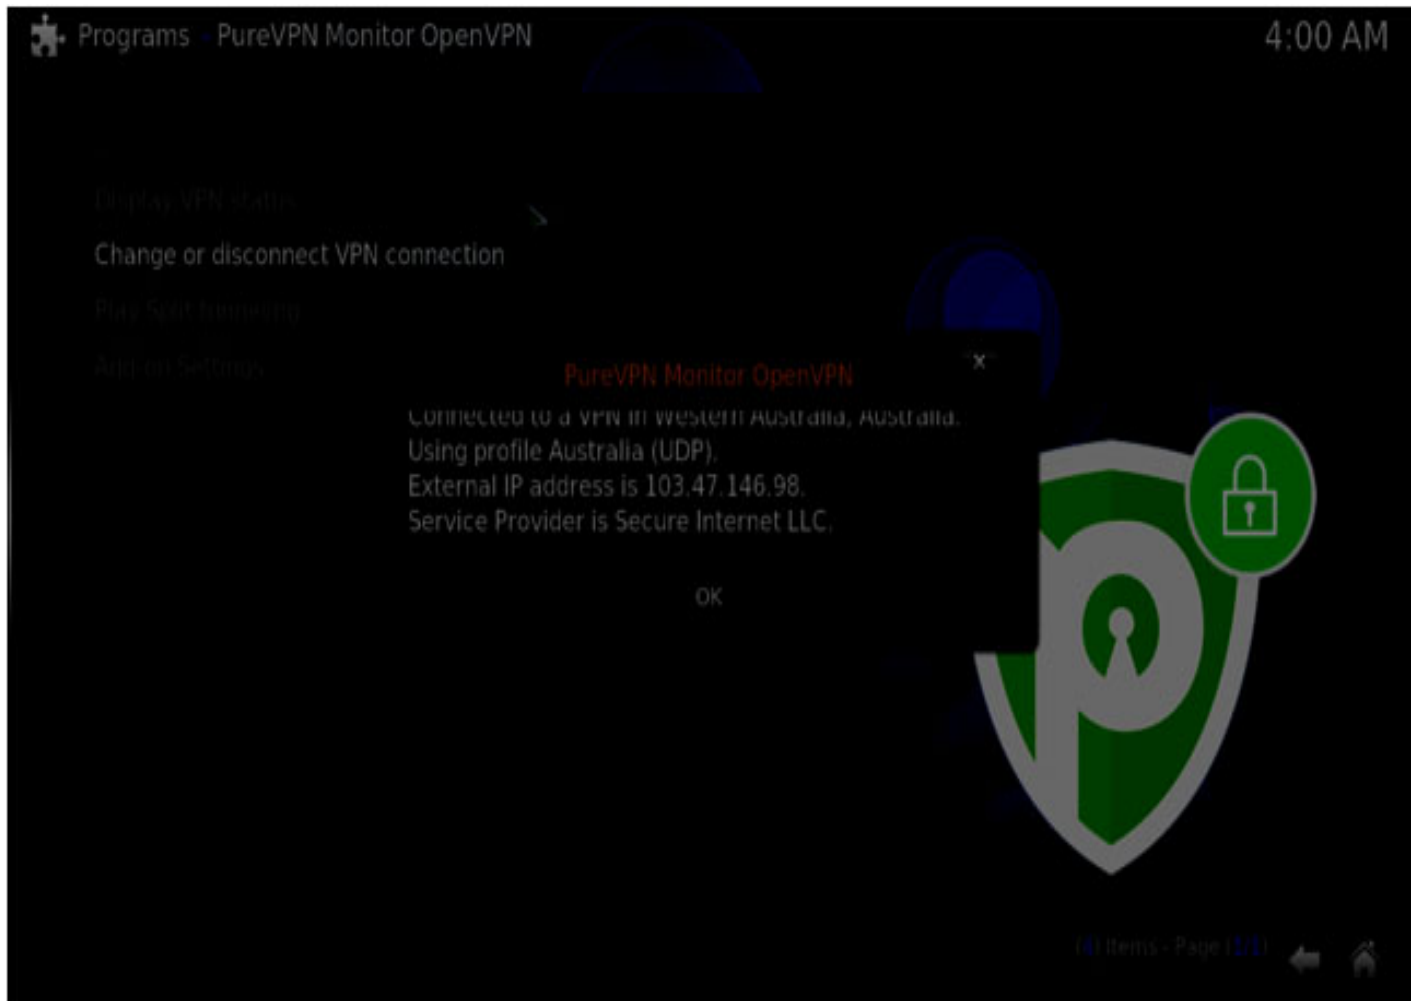

- To check your current VPN status click **Display VPN Status**.

- To disconnect VPN click Change or disconnect **VPN Connection** tab and click **Disconnect**.
