How to Setup PureVPN Manually on iOS Device (IkEv2) ?

Get the Highest Level of Security at Your Fingertips
GET THE MOST SECURED IOS VPN

Get PureVPN →

PureVPN will empower any mobile device, including iOS devices with the smoothest browsing experience and premium security. And all you have to do is follow the steps clearly laid out below:

Things to Consider:

Before you begin, please make sure that:

- You have a working internet connection
- An iOS device with iOS 9 and above version installed (iPad, iPhone etc.)
- A Premium PureVPN account (if you haven't bought yet click here to buy)

Follow these simple steps to configure IKEv2 manually on your iOS device:

1 Go to your home screen and tap on "Settings"

2 Tap "VPN"

3 Tap "Add VPN Configuration…"

4 Manually add the following information:

- Enter "**PureVPNIKEv2**"in the description field.
- Enter the server address. Click here to get the server list. Please enter pointtoserver.com in "Remote ID" field.
- Enter your PureVPN **Username,** e.g: purevpn0m12345
- Enter your PureVPN **password**.

Important Note: Please always remember your PureVPN username & password is different from your Website Member Area email address & Password.

5 Tap the status button to establish a VPN connection.

6 Upon successful connection, a status will be displayed in the menu bar. Also, you can manage your VPN connection through the network settings option.

Congratulations! You are now connected to PureVPN. Enjoy Internet Freedom!!
