How to connect PureVPN manually on Mac.

In order to configure **Tunnel Blick**, you need to download Tunnel Blick and OpenVPN Tunnel Blick files.

- Download/ Install: ?[Tunnelblick from here as per your OSX version](#)
- Download: ?[PureVPN Tunnelblick files from here](#)
- Click Launch

- A new dialogue box will pop up, asking you if you are sure you want to open the app. Click **Open**.

- You will be asked to enter your Mac password. Enter it and click **OK**:

- You can click on the **Tunnelblick icon** in the status bar and select **VPN** details.

- Select **I have configuration files**.

- Another notification will pop-up, instructing you how to import configuration files. Click **OK**.

- Drag and drop the previously downloaded .ovpn file from your Downloads folder to the Configurations tab in Tunnelblick.
- A pop-up will appear, asking you if you want to install the configuration profile for your current user only or for all users on your Mac. Select your preferred option.

- You will be asked to enter your Mac password.

- Now, you may select the **Server** from the list and connect.

- Once you click connect, You will be asked to enter your VPN credentials. Here is how you can find your ?[VPN credentials](#).
- Mark check on Save in Keychain.
- Click **OK**.

- If you see Initialization Sequence Completed message. That means you are now **Connected**.

- Another way to check the connection status is to click the **Open GUI** icon on the top.

- You are **Connected** now. Enjoy PureVPN!
