

PPTP Configuration Guide for Android | PureVPN

NOTE

Starting June 15th, 2021, PureVPN will discontinue offering support for PPTP, L2TP, and SSTP protocols on the majority of VPN locations.

However, at the popular request of our users, we will continue to support the following locations for users to connect using PPTP, L2TP, and SSTP protocols:

Germany: de1.pointtoserver.com
Netherlands: nl1.pointtoserver.com
United Kingdom: uk11.pointtoserver.com
United States: usil1.pointtoserver.com
United States: ustx1.pointtoserver.com
United States: usca1.pointtoserver.com
United States: usfl1.pointtoserver.com
United States: usny1.pointtoserver.com
United States: uswdc1.pointtoserver.com
Australia: au-sd1.pointtoserver.com

The following is the PPTP configuration guide for Android devices. If you wish to configure PPTP protocol on your Android device, all you need to do is to follow the steps written below.

Things to Consider:

Before you begin, please make sure that:

- You have a working internet connection
- An android device (Smartphone, Tablet, etc.)
- A Premium PureVPN account (if you haven't bought yet click ? [here](#) to buy)

Please follow the step by step guide to setup PureVPN on your Android system manually.

- Tap Settings.

- Tap More connection settings.

- Tap VPN

- Tap Add VPN profile

- Insert the following:

1. Insert Name: PPTP.
2. Type: Select PPTP from the drop-down menu.
3. Insert your desired server address in Server Address. (Please refer to the server addresses shared in the note above).
4. Uncheck PPP encryption (MPPE).
5. Enter your PureVPN credentials. Here is a link you can follow to find ? [find your VPN credentials](#).
6. Tap on Save.

- You are now connected
