

Setup PureVPN with PPTP on D-Link DIR-890 router

Don't worry if you can't set up PureVPN on your device directly. You can now do it by setting up the VPN on the router first. If you are using a D-Link DIR-890 router, here's how you can configure PureVPN on it using the PPTP protocol.

1 Go to "Settings" and click "Internet"

2 Enter following information: (edits will be made accordingly)

- My Internet Connection is: PPTP
- PPTP Server IP Address: Your desired PPTP VPN server location address. As In this case Netherlands server address [nl-sk-pptp-01.jumpserver.com](https://www.fastestvpn.com/server-list/) is entered. Please click here to visit [FastestVPN Complete PPTP server list](https://www.fastestvpn.com/server-list/)
- Enter your FastestVPN "Username" and "Password".
- Reconnect Mode: On demand

My Internet Connection is:

PPTP Server IP Address:

Username:

Password:

Reconnect Mode:

Maximum Idle Time: minutes

3 Scroll down and enter following information:

- Address Mode: Dynamic IP
- Primary DNS Server: 8.8.8.8
- Secondary DNS Server: 208.67.220.220

Address Mode:

Primary DNS Server:

Secondary DNS Server:

MTU:

4 Click “Save” button to connect to VPN. You will be connected shortly.

Internet

Use this section to configure your Internet Connection type. There are several connection types to choose from Static IP, DHCP, PPPoE, PPTP, L2TP and DS-Lite. If you are unsure of your connection method, please contact your Internet service provider. Note: If using the PPPoE option, you will need to remove or disable any PPPoE client software on your computers.

Settings >> Internet

On some models of D-Link, the router may reboot. If it does so, re-login and go to “Status” and click on “Connect” button.

To disconnect from the VPN, go back to the D-Link administration page and click on “Disconnect”.

If you want to use internet without VPN connection, go to Internet > Settings. Then, next to “My Internet Connection is:” select Dynamic IP (DHCP) and Save settings.

You are done!!
