

PureVPN for Security

The biggest priority for corporations, small businesses and even regular users is online security. Too much happens online nowadays, which is why it's imperative to protect our digital data. Cybercriminals are coming up with ingenious ways to target new victims. For example, phishing attacks, in which an employee is tricked into clicking an e-mailed link to give hackers access to a corporate network, accounted for about [56% of all breaches](#) in 2016.

By using a VPN, you won't have to worry about:

- Malwares
- Phishing attacks
- DDoS attacks
- ISP tracking

Don't wait till you become a victim. (Be Proactive, Stay Safe! Use a VPN).
