

## How to Setup PureVPN on Windows Phone?

Public Wi-Fi spots are a breeding ground for cybercriminals, hackers and third-party agencies for which no phone is safe from. But PureVPN is the answer to your plight. This guide will assist Windows Phone users on how they can configure PureVPN on their devices.

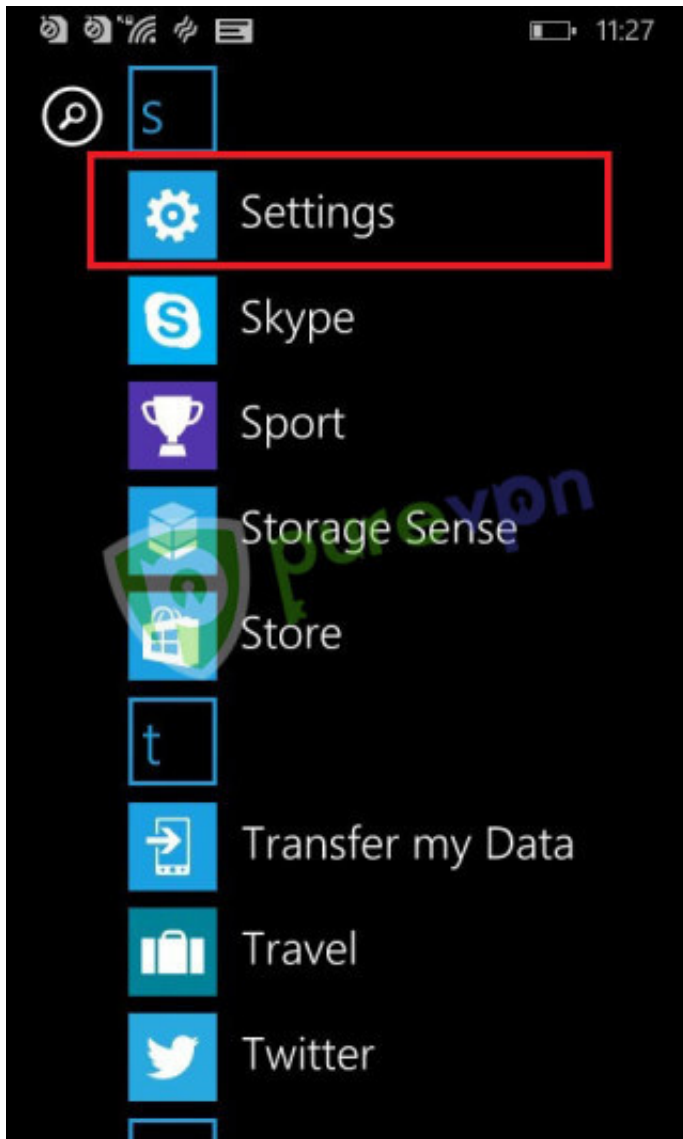

### Things to Consider:

It is imperative that you have the following before you begin:

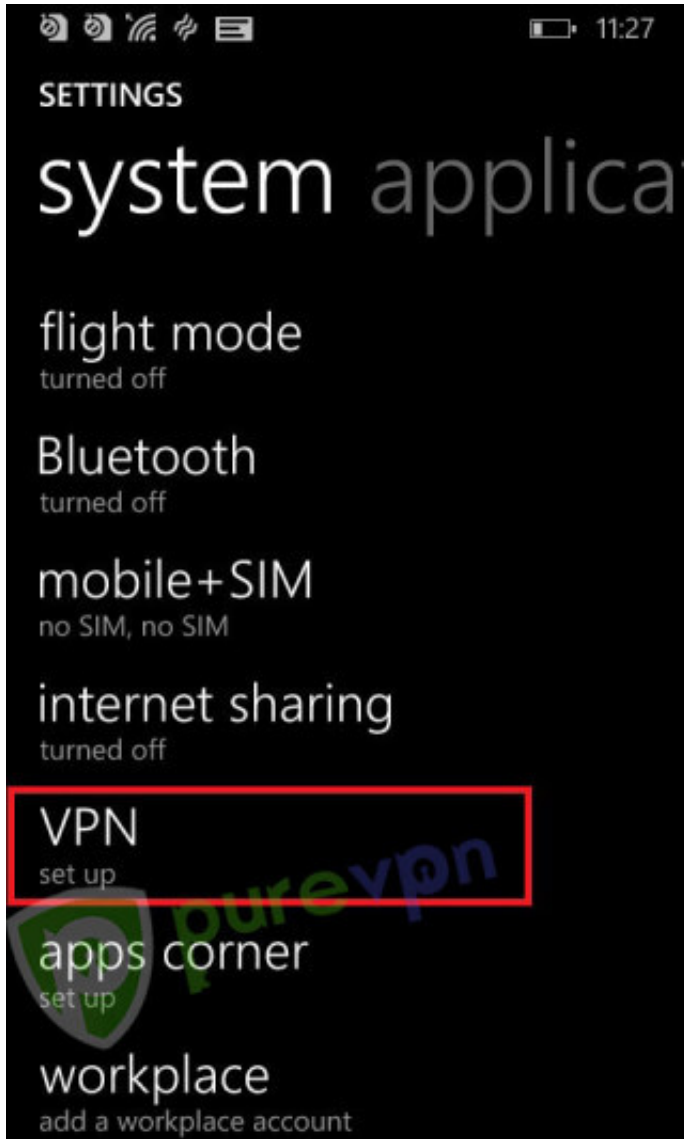

- A working internet connection
- A Windows Phone
- A Premium PureVPN account (if you haven't bought it yet, [click here](#) to buy)

L2TPIKEv2

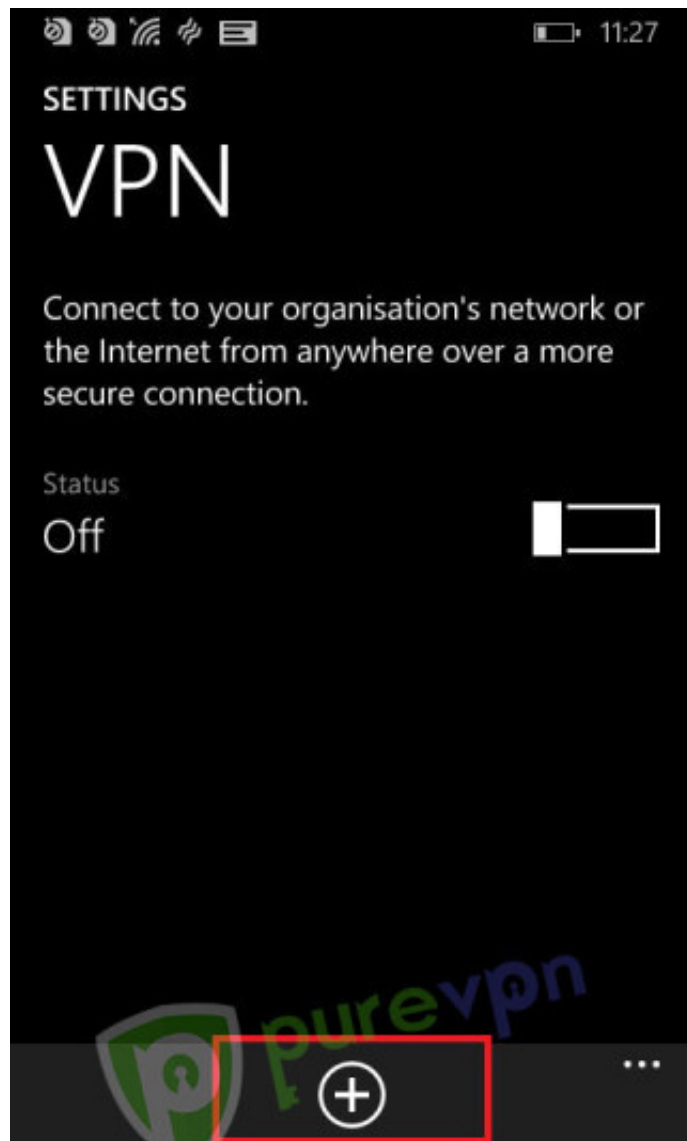

1 Go to Settings.

2 Tap on VPN.

3 Tap on (+) to add VPN profile.

4 Insert the following info:

- Server Name or [IP address](#): Insert desired server address. [Click here](#) to get the server list
- Type: Select “L2TP with IPsec”
- Connect Using: Select “username+password+pre-shared key”
- Username: Insert Username provided by PureVPN. Insert username in this format **purevpn0s123456@purevpn.org**

ADD PROFILE

To find out what settings to use, contact your organisation's support person.

Server name or IP address  
uk1.purevpn.net

Type  
L2TP with IPSec

[Download an SSL VPN app from the Store](#)

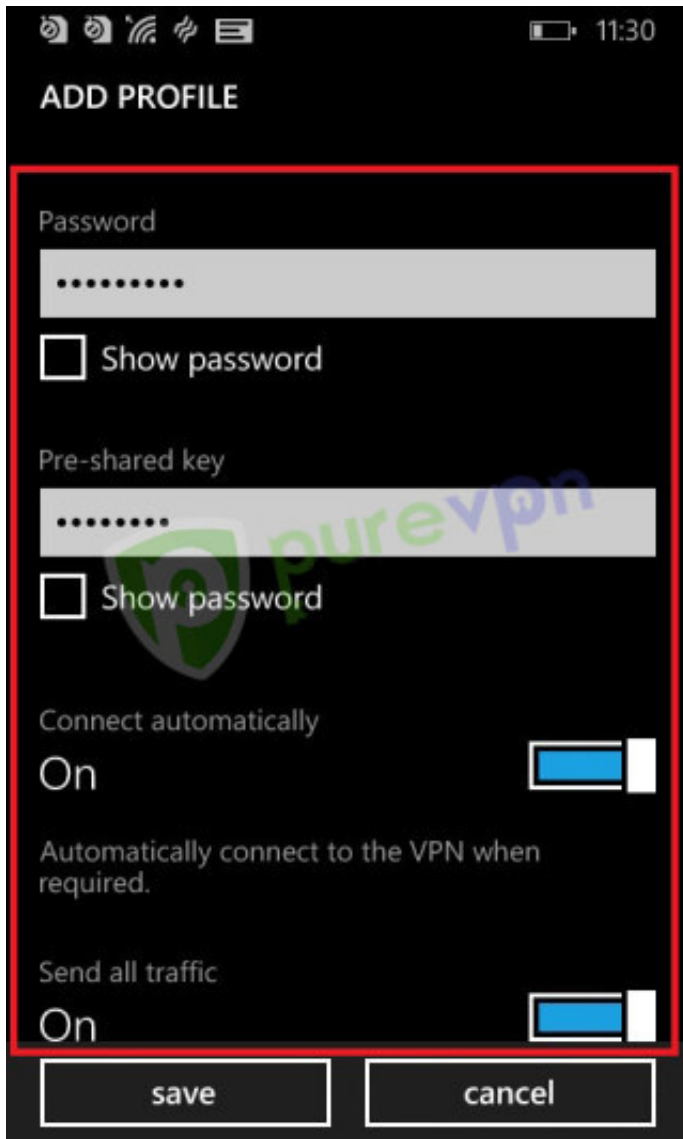

Connect using  
username+password+pre-shared key

Username  
purevpn0s123456@purevpn.org

save cancel

5 Insert the following info:

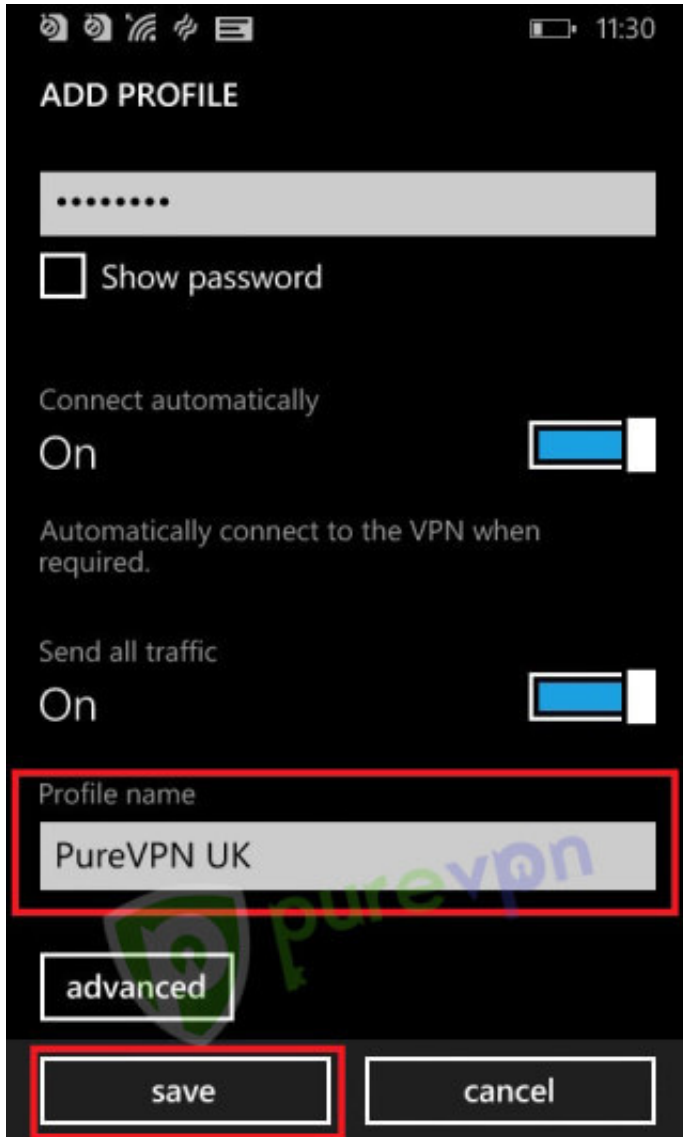

- Password: Insert Password provided by PureVPN
- Pre-shared key: 12345678
